Sign-off Sheet and Signatures of Environmental Professionals

This document entitled Phase I Environmental Site Assessment was prepared by Stantec Consulting Services Inc. ("Stantec") for the account of Oakmont Paolet National Partners, LLC. (the "Client"). Any reliance on this document by any third party is strictly prohibited. The material in it reflects Stantec's professional judgment in light of the scope, schedule and other limitations stated in the document and in the contract between Stantec and the Client. The opinions in the document are based on conditions and information existing at the time the document was published and do not take into account any subsequent changes.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I ESA have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Summary
September 3, 2021

1.0 SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) of the property located at the southwest corner of 9th Street and North Tippecanoe Avenue, City of Highland, San Bernardino County, California (the “Property”), on behalf of Oakmont Pacolet National Partners, LLC (the “Client”). The work was performed according to the Professional Services Agreement between Stantec and the client (the “Agreement”). Oakmont Pacolet National Partners, LLC (the “User”) has been designated as the User of this report. It is Stantec’s understanding that Oakmont Pacolet National Partners, LLC is considering purchase of the Property for a future commercial industrial development.

The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) Designation E 1527-13, and All Appropriate Inquiries (AAI) as defined by the United States Environmental Protection Agency (EPA) in Title 40 of the Code of Federal Regulations, Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM or AAI practice are described in Section 2.3.

The Property, identified by Assessor’s Parcel Numbers (APNs) 027-819-112, -117, 125, and 128 and address of 752 North Tippecanoe Avenue, consists of four contiguous parcels totaling approximately 14.8 acres of vacant undeveloped land located at the southwest corner of 9th Street and North Tippecanoe Avenue, in the City of Highland, San Bernardino County, California. Addresses associated with the Property, and current uses and occupants, are provided in the table below.

Surrounding properties include single-family residential to the east, and commercial development to the west, north, and south. A Property location map is illustrated on **Figure 1**. A Property map illustrating the main features of the Property and its vicinity is provided as **Figure 2**. Photographs taken during the property reconnaissance visit are provided in **Appendix A**.

It is Stantec’s understanding that the Client plans to purchase the Property for future commercial development, consisting of a single warehouse structure approximately 328,740 square feet (sq ft) in size with associated parking areas.

Based on Stantec’s review of historic aerial photographs, the Property appears to have been used for agricultural purposes from the 1930’s through the 1950’s. Multiple small residential structures are located in the southeastern portion of the Property from the 1940’s until recently.

Multiple facilities in the immediate surrounding area have been identified as handling and/or generating hazardous waste. A former leaking underground storage tank (LUST) case is located adjacent to the Site to the west and a UST facility is located to the east across Tippecanoe Avenue. Available historical documentation related to both UST facilities are poor. The western UST facility reported a release of gasoline to soil but the case was closed by the County of San Bernardino on August 5, 1985 and subsequently redeveloped. The UST facility to the east appears inactive with no records indicating removal of the USTs and no reported release case. Due to (1) the lack of a reported release at the UST facility to the east, and (2) case closure and subsequent redevelopment on the former UST facility to the west, the potential for a vapor encroachment condition at the Property is considered low.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Summary
September 3, 2021

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 of the property identified as Assessor's Parcel Numbers (APNs) 027-819-112, -117, 125, and 128 and address of 752 North Tippecanoe Avenue, City of San Bernardino, County of San Bernardino, California the "Property". Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property.

The following business environmental risks (BERs) were identified during this ESA:

- Small debris piles, indicative of illegal dumping, were observed in the eastern portion of the Property during the site visit. Further, small amounts of soil staining were observed in the northern and northeastern portion of the Property where prolonged vehicular parking is suspected. These debris piles and stained areas are considered BERs to the Property.
- Historical records indicate that the Property and vicinity were historically utilized for agricultural purposes in the 1930s and 1940s. Given the intended future use of the Property for commercial/ industrial purposes and the high regulatory thresholds for this type of usage, no further assessment appears warranted at this time. Should off-site disposal of soil be required, Stantec recommends soil sampling to characterize the soil for disposal prior to removal.
- Given the historical agricultural use of the Property, there is potential that unknown subsurface structures (*i.e.* septic systems, leech pits, wells) may be encountered during earthwork activities at the Property. Therefore, Stantec recommends a Soil management Plan (SMP) be prepared for the Property to properly handle these potential issues.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Introduction
September 3, 2021

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform All Appropriate Inquiry (AAI) into the past ownership and uses of the Property consistent with good commercial or customary practice as outlined by the ASTM in “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”, Designation E1527-13. “All Appropriate Inquiry” (AAI) is the process for evaluating a property’s environmental conditions for the purpose of qualifying for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including recognized environmental conditions (“RECs”) of the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions (“HRECs”), and controlled recognized environmental conditions (“CRECs”) that may exist at a property. The term “recognized environmental conditions” means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

1. Due to any release to the environment;
2. Under conditions indicative of a release to the environment; or
3. Under conditions that pose a material threat of a future release to the environment.

ASTM defines a “HREC” as a REC that has occurred in connection with a property, but has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional (EP) must determine whether the past release is a REC when the current Phase I ESA is conducted (e.g., if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM defines a “CREC” as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The presence of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor occurrences of contamination that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies. ASTM also considers the potential for a business environmental

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Introduction
September 3, 2021

risk (BER), defined as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations,

The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or Environmental Professional is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

2.1 PROPERTY DESCRIPTION

The Property, identified by Assessor's Parcel Numbers (APNs) 027-819-112, -117, 125, and 128 and address of 752 North Tippecanoe Avenue, consists of four contiguous parcels totaling approximately 14.8 acres of vacant undeveloped land located at the southwest corner of 9th Street and North Tippecanoe Avenue, in the City of Highland, San Bernardino County, California. Addresses associated with the Property, and current uses and occupants, are provided in the table below.

Surrounding properties include single-family residential to the east, and commercial development to the west, north, and south. A Property location map is illustrated on **Figure 1**. A Property map illustrating the main features of the Property and its vicinity is provided as **Figure 2**. Photographs taken during the property reconnaissance visit are provided in **Appendix A**.

It is Stantec's understanding that the Client plans to purchase the Property for future commercial development, consisting of a single warehouse structure approximately 328,740 square feet (sq ft) in size with associated parking areas.

2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

Other than adherence to Client specific scope of work requirements, there were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Introduction
September 3, 2021

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with the MSA. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report.

This report provides an evaluation of specified environmental conditions associated with the identified property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. 40 CFR 312.20(f)(2) requires that the Environmental Professional evaluate the thoroughness and reliability of provided information. Stantec can neither warrant nor guarantee such thoroughness or reliability, however.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the preparation of this report, and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition.

Project Specific limiting conditions are provided in Section 2.2.

The conclusions are based on the site conditions encountered by Stantec at the time of the work. Accordingly, additional studies and actions may be required. The identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change. In the event of any conflict between the terms and conditions of this report and the terms and conditions of the MSA, the MSA shall control.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an Environmental Professional (EP). The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in **Appendix B**.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

User-Provided Information
September 3, 2021

3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of “All Appropriate Inquiries” into the Property. The ASTM standard requires that the Environmental Professional request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	No environmental issues were identified in the user questionnaire.
Environmental Liens or Activity Use Limitations	N/A	No environmental liens and/or activity use limitations were identified by the User.
Previous Environmental Permits or Reports Provided by User	No	No prior environmental permits or reports were provided by the User.
Purpose of the Phase I ESA	Yes	Environmental due diligence in support of potential purchase of the Property for residential and commercial development.

The User Questionnaire was completed and returned to Stantec by John Atwell, Vice President of Finance with Oakmont Realty. Pertinent User provided information is included in **Appendix C**.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review
September 3, 2021

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the first developed use of the Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections:

Topography:	The Property is approximately 1068 feet above mean sea level (amsl) with a general topographic gradient is to the southwest (EDR, 2021).
Soil/Bedrock Data:	According to regional geologic maps for the area, the lithology at the site is classified as quaternary alluvium, consisting of interbedded sands, silts, and clays, with laterally discontinuous gravels, sourced from the Santa Ana River outwash (United States Geological Survey [USGS], 2006).
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	Groundwater is reported at approximately 190 feet below ground surface (bgs) in the vicinity of the Property (GeoHydrologic, 2009).
NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

4.1.1 Property Topography and Surface Water Flow

The Property elevation is approximately 1068 feet amsl with general topographic gradient to the southwest (EDR, 2021). Based on the topography, surface water on the Property infiltrates into the ground, and/or pools and flows overland to the nearby street located north and east of the Property.

4.1.2 Property Geology and Hydrogeology

The Property is located near the northern boundary of the Peninsular Ranges geomorphic province (California Geologic Survey [CGS], 2002). The Property is located within the San Bernardino Valley, which is bounded on the north by the San Bernardino Mountains and San Gabriel Mountains, on the south and east by the Badlands and Crafton Hills, and on the west by the San Jose Hills. The valley is underlain by several fault-bound structural blocks including the down-dropped San Bernardino Valley Block between the San Andreas and San Jacinto faults, in the area of the Property, and the down-dropped Perris Block between the Elsinore fault to the west, the Cucamonga fault to the north, and the San Jacinto fault to the east.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review
September 3, 2021

Quaternary-aged alluvial deposits are located in the area of the Property, and consist of gravels, sands, and silts sourced from the nearby San Bernardino Mountains. The thickness of alluvium within the San Bernardino Valley varies, increasing from 400 feet at the base of the San Bernardino Mountains to as much as 2,100 feet at the center of the valley in the vicinity of the Loma Linda and San Jacinto fault zone. The alluvial deposits in the Newmark and Muscoy areas consist mostly of sand, gravel, boulders, and occasional discontinuous clay lenses. These clay lenses increase in thickness and number toward the south and the central portion of the basin.

The Property is located within the Bunker Hill Basin of the Santa Ana River watershed. Groundwater in the basin is recharged by streams and creeks that carry surface water from the nearby San Bernardino and San Gabriel Mountains, and from direct infiltration of precipitation into the surface alluvial deposits. Groundwater in the area occurs within the upper and lower alluvial sediments, and within the subjacent Pelona Schist bedrock northeast of the Property. Groundwater elevations fluctuate extensively due to municipal supply and pumping and heavy recharge from the nearby mountains.

Groundwater monitoring data published on the California Water Resources Control Board database website Geotracker (www.geotracker.waterboards.ca.gov) indicates that groundwater within the area of the subject property flows in a southeasterly direction within the sediment units. Groundwater is reported at depths ranging from 120 to over 250 feet below ground surface (bgs) in the vicinity of the Property (Geotracker, 2021). Observed historical fluctuations in local groundwater elevations are on the order of up to 220 feet. The sand and gravelly sands typically found in the area of the Property have excellent water-bearing and water-yielding characteristics.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from EDR, a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Appendix D**.

Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. As described in 4.1.1, the inferred shallow groundwater flow direction is most frequently to the southwest. Observations about the Property and surrounding properties made during the Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Property

The Property addresses were identified in several databases. A summary of those listings is provided in the table below.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review
September 3, 2021

Listed Facility Name/Address	Database Listing	REC? (YES / NO)
Monterey II Elementary School 9 th Street / Tippecanoe Avenue San Bernardino, CA 92410	Envirostor, SCH, CERS	No
This facility is listed in the environmental database report as being located on the Property; however, this facility is located northeast of the Property, on the opposite corner of 9 th Street and Tippecanoe Avenue. The Department of Toxic Substances Control (DTSC) provided oversight of a Preliminary Endangerment Assessment (PEA) report performed in 2004, in anticipation of construction of an elementary school. The PEA report was not available for review.		
9 th Street West of Tippecanoe Avenue San Bernardino, CA 92410	CHMIRS	No
This listing is for the release of approximately 5 gallons of antifreeze and transmission oil. According to the environmental database report, a dump truck crashed into a wall in a flood control channel, resulting in the release of the antifreeze. Cleanup was performed by San Bernardino County Fire Hazmat. An exact location of this incident is not provided in the report. Given the limited quantity of chemical spilled, and cleanup was performed by a local agency, this listing is not considered to pose a REC to the Property.		

4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on adjacent and nearby sites to pose a REC, CREC, or HREC for the Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Property from a nearby property, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC]).

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Property. The basis for why (or why not) each of the following listed databases creates a REC for the Property is also provided.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
USAF Norton AFB 305 South Tippecanoe Avenue San Bernardino, CA 92408	NPL, SemS, CORRACTS, RCRA- TSDf, RCRA-SQG, US ENG CONTROLS, US INST CONTROLS, ROD, PADS	3128 Feet south	No
This facility began operations in 1942, and served as a major overhaul center for jet engines and the general repair of aircraft. Since 1962, the facility has served as a Military Airlift Command Base. Past hazardous waste management practices have contributed to contamination problems throughout the base, including burial of drums and other unspecified materials; disposal of waste oils, solvents, and paint residues into landfills, unlined pits, ponds and drying beds; storage in leaking underground tank, and spills of aviation fuel, oils, solvents, polychlorinated biphenyls (PCBs), and acidic plating solutions.			

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review
September 3, 2021

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
<p>Groundwater below the facility is impacted with trichlorethylene, believed to be sourced from unknown quantities of solvent disposed in several base landfills.</p> <p>Given the physical distance of this facility, and the facility being located hydraulically down-gradient from the Property, this listing is not considered a REC to the Property.</p>			
<p>Vista Manufacturing Company / Vista Consolidated Inc. 1087 9th Street San Bernardino, CA 92410</p>	<p>LUST, RCRA-SQG, Cortese, HAZNET, San Bern. Co. Permit, CERS, HWTS</p>	<p>67 feet west (adjacent)</p>	<p>Yes</p>
<p>This facility is listed for the release of gasoline to the subsurface from a leaking underground storage tank (UST) in 1988. The case was overseen by the Santa Ana Regional Water Quality Control Board (SARWQCB). According to the environmental database, the impacts affected soil only (no groundwater impact). The case received closure in 1985 by the agency. Stantec reviewed the online database for this agency (Geotracker) to review the case closure report; however, no records were listed for this facility on the database.</p> <p>The facility is listed as generating small amounts of waste, including methyl ethyl ketones, and various other solvents. Further, the facility is listed as a large quantity generator from 1990 through 2002. The facility is listed as disposing various wastes, including solvents and paint sludge, from 2006 through 2012.</p> <p>Due to case closure and subsequent redevelopment on the former UST facility to the west, the potential for a vapor encroachment condition at the Property is considered low.</p>			
<p>1180 East 9th Street, A27 San Bernardino, CA 92410</p>	<p>CERS Haz Waste, San Bern. Co. Permit, CERS, HWTS, RCRA NonGen / NLR</p>	<p>138 northwest</p>	<p>No</p>
<p>Several listings are located at the address of 1180 East 9th Street. These facilities are within a multi-tenant commercial space, generally used as automotive repair facilities. These facilities including Smog Tech, Bobs Auto & Tire Service, CJs Auto Service, Dennis' Automotive repair, Leeco Transmission Service, JV Collision, MQ Automotive, and several others. Several of these facilities are listed as handling and/or generating hazardous wastes. Waste disposal records indicate that waste oil, waste antifreeze, and solvents are disposed from the automotive repair collective. Several violations are listed from various facilities, including the improper storage of waste oil filters, and poor administrative records keeping. However, no releases have been reported for the facility.</p> <p>Due to the lack of a reported release, distance (across 9th St), and proposed use of the Property for commercial purposes, the potential for a vapor encroachment condition to exist is considered low.</p>			
<p>Jack Ferguson / Orbit Stations Inc. 908 Tippecanoe San Bernardino, CA 92410</p>	<p>SWEEPS UST, CA FID UST, LUST, Cortese, Hist Cortese, CERS</p>	<p>164 northwest</p>	<p>No</p>
<p>The Jack Ferguson facility is listed for the historical presence of a waste oil tank. No other information is listed for this facility.</p> <p>The Orbit Station facility is listed as a leaking underground storage tank (LUST) case with the SARWQCB. According to information contained in the environmental database report, the UST leaked gasoline and effected soil at the facility, which received closure from this agency in 1990. However, information in the database report indicates this facility is listed at the intersection of Tippecanoe and</p>

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
<p>Benedict Street, located approximately 2 miles south of the Property. The location of this facility was confirmed with a search on Geotracker. Therefore, this facility is improperly located by the environmental database report.</p> <p>Given the facility is located approximately 2 miles south of the Property, this listing is not considered to pose a REC to the Property.</p>			
<p>Abandoned UST – Tippecanoe / Armour Oil Company 7607 North Tippecanoe San Bernardino, CA 92410</p>	<p>San Bern. Co. Permit, UST, CERS Tanks, HIST UST, SWEEPS UST, CA FID UST, EDR Hist Auto</p>	<p>191 east</p>	<p>Yes</p>
<p>According to information in the environmental database report, a historical gas station, identified as Armour Oil Company, operated at 7607 Tippecanoe, located east of the Property. This facility contained three (3) 7500-gallon capacity USTs containing “product”. The historical automotive listings include Armour Oil Company in 1987, California Target Enterprises from 1988 through 1995, and Tippecanoe Auto Parts from 1994 through 1998. Information in the environmental database report indicates that the USTs were installed in circa 1988, and were permitted for removal in approximately 2014; however, violations listed in 2020 indicate that the UST systems remained in-place at the time of inspection in 2020.</p> <p>Due to the lack of a reported release, distance (across Tippecanoe Ave), and proposed use of the Property for commercial purposes, the potential for a vapor encroachment condition to exist is considered low.</p>			
<p>Kalserv E Gas STA 1232 East 9th Street San Bernardino, CA 92410</p>	<p>EDR Hist Auto</p>	<p>255 northeast</p>	<p>Yes</p>
<p>The environmental database report identified this facility as a historical gas station; no other information is provided in the environmental database report.</p> <p>Due to the lack of a reported release, distance (across 9th St), and proposed use of the Property for commercial purposes, the potential for a vapor encroachment condition to exist is considered low.</p>			
<p>Gibson Overseas DC 7776 Tippecanoe Avenue San Bernardino, CA 92410</p>	<p>CERS Haz Waste, San Bern. Co. Permit, CERS, RCRA NonGen / NLR</p>	<p>Adjacent – south</p>	<p>No</p>
<p>This facility is identified as generating hazardous waste and handling hazardous wastes; however, no specific chemicals are listed in the database report. Multiple violations are reported for this facility, including storage of hazardous material above reportable quantities, failure to maintain EPA ID, and other administrative violations.</p> <p>Due to the lack of a reported release, distance (across 9th St), and proposed use of the Property for commercial purposes, the potential for a vapor encroachment condition to exist is considered low.</p>			
<p>Royal Appliance MFG CO 927 East 9th Street, San Bernardino, CA 92410</p>	<p>San Bern. Co. Permit, CERS</p>	<p>Adjacent – west</p>	<p>No</p>

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review
September 3, 2021

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
<p>This facility is identified in the environmental database report as a “chemical storage facility”. Multiple violations are listed for this facility, including handling of an undisclosed hazardous material, substantial change in handlers’ operations, and various administrative violations.</p> <p>Due to the lack of a reported release, distance (across 9th St), and proposed use of the Property for commercial purposes, the potential for a vapor encroachment condition to exist is considered low.</p>			
Tri Cor Braun 927 East 9 th Street, San Bernardino, CA 92410	RCRA NonGen / NLR	Adjacent – west	No
<p>This facility is identified in the environmental database for handling hazardous substances. No violations are reported for this facility. No further details are listed for this facility.</p> <p>Due to the lack of a reported release, distance (across 9th St), and proposed use of the Property for commercial purposes, the potential for a vapor encroachment condition to exist is considered low.</p>			

The remaining listings in the database search report provided in **Appendix D** do not constitute a potential REC for the Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec contacted the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property:

4.3.1 Local Environmental Department

Agency Name Contact Information	Finding
<p>San Bernardino Environmental Health Services 385 North Arrowhead Avenue, 2nd Floor San Bernardino, CA 92415 (800) 422-2283 Date of contact: July 13, 2021</p>	<p>Stantec submitted a records request for the Property to the San Bernardino Environmental Health Services on July 13, 2021. At the time of the preparation of this report no response has been received. Given the historical documents and other regulatory records provided, the lack of a response from this agency is not considered a significant data gap.</p>
<p>Custodian of Records Department of Toxic Substances Control July 13, 2021</p>	<p>A written request subject to the FOIA was submitted to Cypress Regional Office of the DTSC to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property.</p> <p>On July 16, 2021, the DTSC Cypress Regional Office responded that no records were found for the Property.</p>

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review
September 3, 2021

	Further, Stantec researched the online database for this agency, Envirostor. No records were identified in connection to the Property on this database.
Custodian of Records Santa Ana Regional Water Quality Control Board Via email: FileReview8@waterboards.ca.gov http://www.geotracker.waterboards.ca.gov July 13, 2021	A written request subject to the FOIA was submitted to the Santa Ana Regional Water Quality Control Board (SARWQCB) to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. The SARWQCB responded that no records were found for the Property address of 752 Tippecanoe Avenue. Additionally, Stantec researched the online database for this agency, Geotracker. According to this database, no files or cases are associated with the Property.
California Department of Conservation Geologic Energy Management Division (CalGEM) https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx July 19, 2021 13, 2021	Stantec researched this database to identify if the Property is within a mapped oil field, and the potential existence of oil and gas production wells within the vicinity of the Property. According to this database, the Property is not located within an active oil field. No oil or gas wells were identified in the immediate vicinity of the Property. The closest well is located approximately 2 miles to the southwest of the Property, identified as geothermal well Mill & D 2. The well is identified as American Petroleum Institute (API) number 07190048.

4.3.2 Fire Department

Agency Name Contact Information	Finding
San Bernardino County Fire Protection District 620 South E Street, San Bernardino, CA 92415 (909) 386-8401 Date of contact: July 13, 2021	Stantec submitted a public records request to this agency to review available records. The San Bernardino County Hazardous Materials Division identified no records for the Property.

4.3.3 Local Building and/or Planning Department Records

Agency Name Contact Information	Findings
City of San Bernardino Building & Safety 201 N E Street Unit B	Stantec searched for available permits on the City of San Bernardino Building & Safety online database.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Agency Name Contact Information	Findings
San Bernardino, CA 92401 Online Database: http://www.ci.san-bernardino.ca.us Date of contact: July 13, 2021	Multiple permits were identified for the property address of 752 Tippecanoe, including a traffic control permit, a property inspection form, an application for a 52,000 square foot warehouse

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

No land title records, deeds, environmental liens, and activity and use limitation documentation were provided by the User, and public records were not searched by Stantec.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone.

The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

Year	Scale	Observations, Property and Adjoining Properties
1930	1"=500'	The Property and vicinity appear to be developed for agricultural purposes (row crops). No structures are located within the Property boundaries. Multiple small structures, likely residential, are located in the southeastern corner of the Property.
1938	1"=500'	The Property appears to remain utilized for row cropping. The structures located in the southwestern corner of the Property have been removed, and replaced with new residential structures. Surrounding properties appear to be utilized for agricultural purpose, with orchards observed on properties to the north and east.
1949	1"=500'	Multiple residential structures are located in the southeastern corner of the Property. The remainder of the Property appears to be unchanged from the previous aerial photographs. Residential development has occurred in the surrounding area south of the Property.
1953	1"=500'	The Property appears to be in the same configuration as the previous photograph, with the additional of a small drainage canal bisecting the Property, traversing east to west. Additional residential development is present west of east of the Property.
1959	1"=500'	The Property and surrounding area appear similar to the previous photograph. A commercial warehouse is located adjacent west of the Property.
1966 1968	1"=500'	Several small structures are located in the southeastern portion of the property, likely related to the previously-observed residences in this area. The remainder of

Year	Scale	Observations, Property and Adjoining Properties
1975		the Property, and surrounding area, appears unchanged from the previous photograph.
1985	1"=500'	Some of the suspected residential structures have been removed from the southeastern portion of the Property. The remainder of the Property and surrounding area appears similar to the previous photograph.
1989 1994 2002 2006	1"=500'	The Property appears similar to the previous photograph. A commercial facility is located adjacent north of the Property beyond 9 th Street. Commercial and residential development occurs in the surrounding area during this time period.
2009 2012 2016	1"=500'	The Property appears similar to the previous photographs; a single residence is located in the southeastern corner of the Property, and the remainder of the Property is undeveloped. Large commercial warehouses are now located adjacent west and south of the Property.

Source: The EDR Aerial Photo Decade Package

4.4.3 City Directories

Stantec retained a third party to research available reverse city directories for the Property, in approximately five-year intervals. The Property is listed below from 1961 to 2014. The listings for the surrounding area were primarily residential or commercial retail. No environmental concerns were identified in the review of the city directory listings.

Address	Year	Listed Occupants
Subject Property: 752 Tippecanoe Avenue	1999 – 2017	Various residential listings
Adjacent East: 7607 Tippecanoe Avenue	--	No listings
Adjacent North: 1080 East 9 th Street	2003 1991 1991 – 2017	Various Automotive repair facilities Upholstery, Janitor service Residential Listings (San Bernardino Recreation Park)
Adjacent North: 908 East 9 th Street	1999 – 2014	Michael Shin
Adjacent South: 7776 North Tippecanoe	--	No listings
Adjacent South: 7864 North Tippecanoe	--	No listings
Adjacent South: 7872 North Tippecanoe	--	No listings
Adjacent West:	1994 – 2009	Vista Camper Shells, Vista Consolidated

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Property uses.

Stantec requested fire insurance maps from EDR; no historical fire insurance maps were available for the Property. The Sanborn® Map Search Report is presented in **Appendix E**.

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-Minute Topographic Maps of the Redlands, Harrison Mountain, San Bernardino North, San Bernardino South, Colton, and Arrowhead, California Quadrangle maps to assist in identifying past Property usage and areas of potential environmental concern. The Property was identified as being used for agricultural activities until at least 1942. Copies of the historical maps are provided in **Appendix E**. The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations, Property and Adjoining Properties
1896	1:62,500	The Property appears vacant. Sparse development is observable throughout the area, depicted by small rectangular symbols, likely residential structures. Major roadways are shown on the map, and Highland Motor Rail Road is shown approximately ½-mile to the south of the Property.
1898	1:62,500	
1999	1:62,500	
1901	1:125,000	
1936	1:24,000	
1938	1:24,000	
1942	1:24,000	
1943	1:24,000	
1953	1:24,000	The Property remains largely undeveloped. Two small structures are located in the southeastern portion of the Property, likely residences. Development has occurred in the surrounding area, depicted by orange shading and the addition of small structures.
1954	1:24,000	
1967	1:24,000	The Property remains depicted are largely undeveloped through this time period.
1973	1:24,000	
1975	1:24,000	
1980	1:24,000	
2012	1:24,000	White shading indicates dense development. No structures are depicted on the map.

4.4.6 Other Historical Sources

No other historical sources were reviewed as part of this assessment.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance
September 3, 2021

5.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Mr. Joshua Sargent, Associate Geologist with Stantec, on July 15, 2021. Stantec was unaccompanied during the Property visit. **Figure 2** provides information about the Property and adjoining properties and the location of potential areas of environmental concern. Photographs collected during the Property visit are included in **Appendix A**.

5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse safely accessible outer Property boundaries.
- Traverse transects across the Property.

Weather conditions during the visit to the Property were warm and sunny. There were no weather-related Property access restrictions encountered during the reconnaissance visit.

5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property, identified by Assessor's Parcel Numbers (APNs) 027-819-112, -117, 125, and 128 and address of 752 North Tippecanoe Avenue, consists of four contiguous parcels totaling approximately 14.8 acres of vacant undeveloped land located at the southwest corner of 9 th Street and North Tippecanoe Avenue, in the City of Highland, San Bernardino County, California. Surrounding properties are a mixture of residential and industrial properties.
Property Operations:	Vacant land. Various street vendors occupy the northeast corner near the intersection of 9 th Street and Tippecanoe Avenue.
Structures, Roads, Other Improvements:	The majority of the Property is vacant land. Multiple buildings foundations are located in the southeastern portion of the Property, likely from the former residential structures located in this area. Remnants of
Property Size (acres):	14.8 acres
Estimated % of Property Covered by Buildings and/or Pavement:	1%
Observed Current Property Use/Operations:	Vacant land.
Observed Evidence of Past Property Use(s):	Agricultural use.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance
September 3, 2021

Sewage Disposal Method (and age):	Unknown.
Potable Water Source:	Unknown.
Electric Utility:	Unknown.

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	None observed.
Drums (≥ 5 gallons):	None observed.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	A pole-mounted transformer was observed along Tippecanoe Avenue along the eastern Property boundary. The transformer appeared in good condition without any indication of leaking or staining.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

5.4 INTERIOR OBSERVATIONS

No structures are currently located on the Property.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	Multiple areas of stained soil were observed along the northern Property boundary along East 9 th Street, and within the gravel parking area in the northeastern portion of the property, related to automotive parking.
Stressed Vegetation:	None observed.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance
September 3, 2021

Observations	Description
Waste Streams and Waste Collection Areas:	General refuse was observed throughout the Property. Small debris piles were observed in the eastern portion of the Property, indicative of illegal dumping.
Solid Waste Disposal:	Multiple dumping area were observed in the eastern portion of the Property.
Potential Areas of Fill Placement:	None observed.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	No exterior stormwater discharge was observed. Surface water on the Property is expected to infiltrate the ground surface.
Wells:	No water wells were observed.
Septic Systems:	No visible evidence of the existence of a septic system was observed.
Other Exterior Observations:	None observed.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of ASTs, was discovered during the site reconnaissance.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining properties:

NORTH	East 9 th Street, followed by and automotive repair commercial business park.
SOUTH	Commercial warehouse.
EAST	North Tippecanoe Avenue, followed by vacant land and single-family residences.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance
September 3, 2021

WEST	Commercial warehouse.
-------------	-----------------------

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining properties providing indications of past use and activities, if any, are described below.

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds, and lagoons on adjoining properties:

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	General slope to the southwest.
---	---------------------------------

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Interviews
September 3, 2021

6.0 INTERVIEWS

Stantec did not conduct any interviews as part of this assessment.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Evaluation
September 3, 2021

7.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data review, and a Property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions.

Finding 1: Historical records indicate that the Property and vicinity were historically utilized for agricultural purposes in the 1930s and 1940s.

Opinion 1: Given the intended future use of the Property for commercial/ industrial purposes and the high regulatory thresholds for this type of usage, no further assessment appears warranted at this time. Should off-site disposal of soil be required, Stantec recommends soil sampling to characterize the soil for disposal prior to removal.

Finding 2: Multiple facilities in the immediate surrounding area have been identified as handling and/or generating hazardous waste. A former leaking underground storage tank (LUST) case is located adjacent to the Site to the west and a UST facility is located to the east across Tippecanoe Avenue. Available historical documentation related to both UST facilities are poor. The western UST facility reported a release of gasoline to soil but the case was closed by the County of San Bernardino on August 5, 1985 and property was subsequently redeveloped. The UST facility to the east appears in active with no records indicating removal of the USTs and no reported release case.

Opinion 2: Due to (1) the lack of a reported release at the UST facility to the east, and (2) case closure and subsequent redevelopment on the former UST facility to the west, the potential for a vapor encroachment condition at the Property is considered low.

7.2 DATA GAPS

The federal AAI final rule [40 CFR 312.10(a)] and ASTM E1527-13 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the Environmental Professional or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 1.4:	None.
Weather-Related Restrictions to Site Reconnaissance:	None.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Evaluation
September 3, 2021

Gap	Discussion
Facility Access Restrictions to Site Reconnaissance:	None.
Other Site Reconnaissance Restrictions:	None.
Data Gaps from Environmental Records Review:	To date, some electronic records have not yet been received, but are not considered to impact the ability of the EP to identify RECs.
Data Gaps from Historical Records Review:	None.
Data Gaps from Interviews:	None.
Other Data Gaps:	None.

7.3 CONCLUSIONS

The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) Designation E 1527-13, and All Appropriate Inquiries (AAI) as defined by the United States Environmental Protection Agency (EPA) in Title 40 of the Code of Federal Regulations, Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM or AAI practice are described in Section 2.3.

The Property, identified by Assessor's Parcel Numbers (APNs) 027-819-112, -117, 125, and 128 and address of 752 North Tiptecanoe Avenue, consists of four contiguous parcels totaling approximately 14.8 acres of vacant undeveloped land located at the southwest corner of 9th Street and North Tiptecanoe Avenue, in the City of Highland, San Bernardino County, California. Addresses associated with the Property, and current uses and occupants, are provided in the table below.

Surrounding properties include single-family residential to the east, and commercial development to the west, north, and south. A Property location map is illustrated on **Figure 1**. A Property map illustrating the main features of the Property and its vicinity is provided as **Figure 2**. Photographs taken during the property reconnaissance visit are provided in **Appendix A**.

It is Stantec's understanding that the Client plans to purchase the Property for future commercial development, consisting of a single warehouse structure approximately 328,740 square feet (sq ft) in size with associated parking areas.

Based on Stantec's review of historic aerial photographs, the Property appears to have been used for agricultural purposes from the 1930's through the 1950's. Multiple small residential structures are located in the southeastern portion of the Property from the 1940's until recently.

Multiple facilities in the immediate surrounding area have been identified as handling and/or generating hazardous waste. A former leaking underground storage tank (LUST) case is located adjacent to the Site to the west and a UST facility is located to the east across Tiptecanoe Avenue. Available historical documentation related to both UST facilities are poor. The western UST facility reported a release of gasoline to soil but the case was closed by the County of San Bernardino on August 5, 1985 and property was subsequently redeveloped. The UST facility to the east appears in active with no records indicating

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Evaluation
September 3, 2021

removal of the USTs and no reported release case. Due to (1) the lack of a reported release at the UST facility to the east, and (2) case closure and subsequent redevelopment on the former UST facility to the west, the potential for a vapor encroachment condition at the Property is considered low.

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 of the property identified as Assessor's Parcel Numbers (APNs) 027-819-112, -117, 125, and 128 and address of 752 North Tippecanoe Avenue, City of San Bernardino, County of San Bernardino, California the "Property". Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property.

The following business environmental risks (BERs) were identified during this ESA:

- Small debris piles, indicative of illegal dumping, were observed in the eastern portion of the Property during the site visit. Further, small amounts of soil staining were observed in the northern and northeastern portion of the Property where prolonged vehicular parking is suspected. These debris piles and stained areas are considered BERs to the Property.
- Historical records indicate that the Property and vicinity were historically utilized for agricultural purposes in the 1930s and 1940s. Given the intended future use of the Property for commercial/ industrial purposes and the high regulatory thresholds for this type of usage, no further assessment appears warranted at this time. Should off-site disposal of soil be required, Stantec recommends soil sampling to characterize the soil for disposal prior to removal.
- Given the historical agricultural use of the Property, there is potential that unknown subsurface structures (*i.e.* septic systems, leech pits, wells) may be encountered during earthwork activities at the Property. Therefore, Stantec recommends a Soil management Plan (SMP) be prepared for the Property to properly handle these potential issues.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Non-Scope Considerations
September 3, 2021

8.0 NON-SCOPE CONSIDERATIONS

The following ASTM E1527-13 non-scope services were performed as part of this Phase I ESA:

8.1 LEAD-BASED PAINT

Concern for LBP is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

- The age of the dwelling as follows:
 - Maximum risk is from paint applied before 1950.
 - There is severe risk from paint applied before 1960.
 - There is moderate risk from deteriorated paint applied before 1970.
 - There is slight risk from the paint that is intact but applied before 1977.
- The condition of the painted surfaces.
- The presence of children and certain types of households in the building.
- Previously reported cases of lead poisoning in the building or area.

No structures are currently present on the Property.

8.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is ACM that can be reduced to powder by hand pressure. Friable asbestos can become airborne and inhaled, which has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

No structures are currently present on the Property.

8.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Non-Scope Considerations
September 3, 2021

radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA on average indoor radon concentrations in the vicinity of the Property (<http://www.epa.gov/radon/zonemap.html>).

EPA Radon Zones (w/Average Measured Indoor Radon concentrations)		
Zone 1 – High (>4.0 pCi/L)	Zone 2 – Moderate (2 to 4 pCi/L)	Zone 3 – Low (<2 pCi/L)
	X	
Normally occupied sub grade areas present? (i.e., basement apartments, offices, stores, etc.)		
No subgrade areas currently present at the Property.		

The Property is located in Zone 2 and is considered to have a moderate potential for radon. To determine Property-specific radon levels, a radon survey would have to be conducted. However, because the Property does not have any occupied subgrade areas and is planned for redevelopment, radon appears unlikely to represent an environmental concern and further investigation of indoor radon issues does not appear to be warranted.

APPENDICES

Appendix A Photographs of the Property and Vicinity

Photo #1 View of northeastern corner of Property, looking to the west. Multiple street vendors occupy this portion of the Property. Some surficial staining are observable in this areas, likely sourced from vehicular parking.

Photo #2 View of northwestern portion of Property, looking to the west. Some minor debris is observable in this portion of the Property.

Photo #3 Alternate view of northwestern portion of Property, looking to the west. Some minor debris is observable in this portion of the Property.

Photo #4 Overview of central and southern portion of the Property, looking to the southwest.

Photo #5 View looking south along the northern portion of the western Property boundary. Commercial use is located adjacent-west of the Property.

Photo #6 View of fence located in central portion of the Property. View looking to the east.

Photo #7 Southern portion of Property, view looking to the southeast.

Photo #8 View of concrete residential building foundations located in southeastern portion of the Property. View looking to the northwest.

Photo #9 View of concrete residential building foundations located in southeastern portion of the Property. View looking to the west.

Photo #10 View of possible illegal dumping activity in eastern portion of the Property.

Appendix B STANTEC RESUMES

Joshua is a staff geologist with a master's degree in geological sciences. He has extensive field experience in Phase I and II Environmental Site Assessment (ESA) field work and report preparation and environmental remediation. His field experience includes mapping of shallow faults throughout Southern California using refraction seismology equipment, soil logging and collection, soil vapor collection, and surface and groundwater collection with basic flow measurements and parameter stabilization. Joshua also has experience working with 1166 South Coast Air Quality Management District (AQMD) air monitoring on projects ranging from limited access dry cleaner excavations, solvent excavations, and petroleum excavations related to underground storage tank releases. Included in this type of monitoring is the assessment of a safe work environment for the contractors involved with this type of work. He is skilled in using ArcGIS 10, Adobe Suite, and the Microsoft Office Suite.

Joshua's environmental consulting experience includes performing Phase I Environmental Site Assessments in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13, and the collection, and interpretation of Phase II Environmental Assessment data. Joshua also has experience in preparing detailed Remedial Actions Plans (RAPs), groundwater monitoring reports, and other documents for State and County agency submittal.

CERTIFICATIONS & TRAINING

First Aid and CPR Certification, American Safety, Redlands, California, 2015

40-Hour Hazwoper, OSHA, Signal Hill, California, 2012

8-Hour Refresher Course Hazwoper Standard (29 CFR 1910.120), OSHA, Redlands, California, 2020

8-Hour Supervisor Trainer Course Certification Hazwoper Standard, OSHA, Redlands, California, 2015

REGISTRATIONS

Professional Geologist #9730, State of California

PROJECT EXPERIENCE

Health and Safety Management

Health and Safety Subcontractor Oversight Services (Geological Staff)

Joshua has provided subcontractor oversight for field activities including soil, soil vapor, and groundwater sampling. Other field activities include well destruction and on-site remediation.

Environmental Site Assessments

Environmental and Geotechnical Soil Assessment, Various Locations, Arizona, California, and Nevada (Soil Assessment, 2013-Present)

Joshua has performed environmental soil assessments throughout California, Arizona, and Nevada. These activities have included soil collection for geotechnical and environmental purposes and logging using various drilling techniques including direct push technology (DPT), hollow stem auger (HSA), cone penetrometer testing (CPT), and sonic. The collected soils were logged in accordance with the United Soil Classification System (USCS).

Joshua Sargent PG

Geologic Staff · 10 Years of Experience · San Bernardino, California

Role: Soil Assessment | Cost: Varies; \$10,000-\$100,000 | Dates involved: 08/2013-Ongoing

Phase II Site Assessment, California (Author)

Joshua has conducted the field investigation and formulated the deliverable related to identified recognized environmental conditions (RECs) for the Property. The field responsibilities included managing on-site contractors and health and safety operations, and the collection of soil soil vapor, and groundwater. The office responsibilities included the review and interpretation of analytical data, authoring and reviewing the report deliverable to the client.

Phase I Site Assessment, California (Phase I and Phase II Environmental Site Assessment, Author)

Joshua performed an on-site reconnaissance survey, historical records investigation, and formulated the report deliverable. The report provided a thorough review of the property history and defined present environmental concerns for the client.

Soil Sampling

Dust and Pesticide Monitoring, Soil Sampling, Monterey Park, California (Field Oversight, 2013-2014)

Project Value: AED 150K

Joshua performed field oversight during contaminated soil removal at a future residential community. Dust and toxaphene were monitored simultaneously to generate a site-specific threshold for dust concentration. Routine dust monitoring was performed once the threshold was determined. Property gridding and soil sampling were performed to determine contamination.

Role: Field Oversight | Cost: \$150,000 | Dates involved: 01/2013-06/2014

Soil Vapor Intrusion Assessment

Vapor Intrusion Assessment from Historical Manufacturing Operations, North San Diego County, California (Technical Support, 2017-Present)

Joshua has been involved with assessing the possible intrusion of harmful vapors into commercial and residential structures related to a release of solvents from a historical manufacturing facility. Joshua has been the site contact for all assessment activities and the lead oversight staff for all on-site and off-site activities. These assessments have included the collection of soil, soil vapor, sub-slab vapor, and groundwater throughout the area, located on public and private property. Joshua has overseen remedial efforts at the Site, which have included the installation of air purifiers, floor sealing, and target depressurization areas.

Role: Technical Support | Cost: Varies; \$50,000 - 1,000,000 | Dates involved: 02/2017-Ongoing

Soil Vapor Monitoring Well Installation, Various Locations, California (Field Oversight, 2015-Present)

Project Value: USD 60K

Joshua performed field oversight during the installation of multiple soil vapor monitoring wells. He assisted with health and safety oversight, described the soil during drilling, activities, assisted with the well installation, and conducted the subsequent soil vapor sampling.

Role: Field Oversight | Cost: \$60,000 | Dates involved: 03/2015-Ongoing

Joshua Sargent PG

Geologic Staff · 10 Years of Experience · San Bernardino, California

Technical Writing

Various Technical Writing Projects (Geological Staff, 2013-Present)

Joshua prepares Health and Safety plans, written permit applications, Phase I and Phase II Environmental Site Assessments reports, Work Plans detailing the results from soil, soil vapor, and groundwater sampling.

Role: Health and Safety Support | Cost: Varies; \$10,000-\$100,000 | Dates involved: 08/2013-Ongoing

Environmental Site Remediation

Soil Vapor Remediation, Orange County, California (Geological Staff)

Joshua has provided monthly operation and maintenance on a soil vapor extraction system operating at a historical landfill. Components of the operation and maintenance included measurements of the recovered vapor for methane and volatile organic compounds, and collecting flow measurements from the extraction wells. Joshua prepared month operation and maintenance reports.

Subcontractor Oversight Services and Confirmation Soil Sampling (Geological Staff)

Joshua has provided subcontractor oversight for remedial excavation of pesticide- and petroleum-impacted soil, and later conducted confirmation sampling to ensure all impacted material had been removed from the Site.

Joshua Sargent PG

Brian Viggiano PG

Senior Geologist · 19 Years of Experience · San Bernardino, California

Brian is a California Professional Geologist with approximately 19 years of professional experience in the environmental and geotechnical fields. He has performed and managed numerous Environmental Site Assessments (ESAs) for real estate transfers, bank loans, and redevelopment projects. Related sites have included former and active retail petroleum stations, former oil fields, dry cleaners, agricultural sites, plating facilities, landfills, chemical plants, and other industrial facilities. He has also performed site assessment, investigation, characterization, and remedy of soil and groundwater contamination utilizing established and innovative technologies including single and multi-phase extraction, in-site chemical oxidation, pump and treat, electrical resistance heating, and chemical fixation. Brian has also performed geotechnical investigations at proposed school developments and for academic purposes. Projects have included evaluation of active and potentially active faults, seismic evaluations, geophysical surveys, and evaluation of remotely sensed data. His versatility and range of environmental and geotechnical skills have been utilized in all stages of investigation including planning, implementation, site reconnaissance, mapping, surveys, and site inspections during construction, assessment or cleanup to final drafting, illustration, and report preparation.

PROJECT EXPERIENCE

Environmental Site Remediation

Former Dry Cleaning Facility, Oxnard, California

Brian implemented field investigations designed to evaluate the nature and extent of CVOC contamination to soil and groundwater related to a former dry cleaning facility. The completed investigations and well installations were used to characterize and remedy the site using soil vapor extraction. SVE provided for effective remedy of soil impact and the Site was closed by the Ventura County Department of Environmental Health.

Brian Viggiano PG

Senior Geologist · 19 Years of Experience · San Bernardino, California

Assessment and Remediation of a Former Communications and Electronics Facility, Mission Viejo, California (Remediation Support, 2011-Present)

Brian worked with others to design, implement, and evaluate field investigations designed to support site characterization, risk assessment, and feasibility studies at a facility impacted with CVOCs in soil and groundwater. Investigations included collection and evaluation of indoor air concentrations, and subsurface investigations designed to evaluate site geologic relationships, in addition to soil, soil gas, and groundwater CVOC concentrations in multiple aquifers. Investigations are ongoing to determine the feasibility of several remedial approaches including, ERD, ERH, and MNA.

Role: Remediation Support | Cost: Unknown |
Dates involved: 03/2011-present

Assessment and Remediation of a Former Aerospace Manufacturing Facility, Glendale, California (Remedial Investigations, 2007-Present)

Brian performed remedial investigations to support site characterization, feasibility studies (ISCO, ERD, MNA), risk assessment, and implementation of remedial actions at a PRP site in the San Fernando Valley Groundwater Superfund Site involving 1,4-dioxane, CVOCs, and hexavalent chromium. CVOC and 1,4-dioxane were mitigated through a combination of removal action, vapor extraction, and monitored natural attenuation. Hexavalent chromium was treated through a combined program of excavation and in-situ chemical reduction using calcium polysulfide and enhanced biological reduction using emulsified oil and fructose.

Role: Remedial Investigations | Cost: Unknown |
Dates involved: 11/2007-Ongoing

Remedial Groundwater Investigations and Feasibility Studies at a Multi-RP Superfund Site, Nebraska

Brian worked with others to provide environmental engineering services to a group of potentially responsible parties (PRPs) to evaluate the effectiveness of remedial initiatives by assessing residual levels of VOCs in a drinking water supply aquifer. Services included evaluating the capacity of monitored natural attenuation to obtain cleanup goals established under the remedial design (RD)/remedial action (RA) Consent Decree established by the USEPA, through development and implementation of groundwater sampling and analysis programs, aquifer flow testing using tracers and groundwater modeling applications for evaluating VOCs degradation in the aquifer. Brian also helped to design and implement a pilot study to determine the feasibility of using in-situ chemical oxidation (ISCO) to enhance the natural rate of CVOC degradation in suspected source areas.

Chemical Plant Decommissioning and Remediation, Vernon, California (Field Geologist/Site Superintendent)

Brian worked as the field geologist/site superintendent during assessment, below grade demolition, and Remediation of an historical chemical plant located in the City of Vernon, California. Assessment activities consisted of evaluating historical process areas, below grade structures, and settling ponds impacted by high levels of pesticides, heavy metals, and radionuclides (Thorium-232 and Uranium-238). Remediation activities consisted of excavation and off-site disposal of radiological and chemically impacted waste, corrective grading, and capping of residual wastes. The project value was \$8 million.

Brian Viggiano PG

Senior Geologist · 19 Years of Experience · San Bernardino, California

Former Open Dump Site, Hopi and Navajo Tribal Lands, Arizona (Field Geologist, Ongoing)

Brian worked as the field geologist at a former open dump site located on Hopi and Navajo Tribal lands. The open dump was reported to have been the source of elevated concentrations of uranium and other radionuclides in groundwater at the site and vicinity. Brian conducted a collaborative multi-week field study with U.S. Geological Survey (USGS) to assess site geological relationships, potential groundwater flow paths and plume limits, and potential for spring and drinking water resources to be impacted by leachate from the open dump. Field work included rock coring, installation of groundwater monitor wells, field mapping, and stratigraphic analysis. Subsequent data analysis included review of comprehensive legacy data and evaluation of landfill leachate tracers (e.g., tritium, and whole rock and leachability data). The investigation is ongoing and is being conducted collaboratively with the USGS, Department of Interior, and Environmental Protection Agency.

Garden Grove Redevelopment Project, Garden Grove, California (Project Geologist, 2006)

Brian implemented remedial investigation of petroleum-impacted soil and groundwater. His investigation consisted of soil sampling, installation, and subsequent development and sampling of groundwater monitoring wells. He worked with others to design and implement a complex dual-phase extraction system that included the installation of 45 extraction wells and two soil vapor extraction systems. He completed work under the oversight of the State of California.

Claremont Residential Development, Claremont, California (Project Geologist, 2006)

Brian performed a remedial investigation that identified the presence of approximately 9,000 cubic yards of lead impacted fill materials. He designed and implemented corrective grading plan that included the generation of numerous small stockpiles of soil that were statistically characterized and either reused on-site or disposed off-site. Site mitigation was conducted under the oversight of the Los Angeles County Fire Department. The innovative grading approach resulted in client cost savings of \$500,000.

Residential Redevelopment Project, Torrance, California (Project Geologist, 2006)

Brian oversaw Remediation of petroleum and solvent contamination that resulted from historical oil field activities overprinted by contamination from a more recent release from a dry cleaning facility. The site was mitigated to residential standards under State of California oversight. Remedial actions included re-abandonment of an on-site oil well and removal of the historical pipeline infrastructure, excavation and on-site bioremediation of petroleum impacted soil, and soil vapor extraction to reduce solvent impact in the vicinity of the former dry cleaners. In addition, at all locations where solvent-impacted soil was recalcitrant to vapor extraction due to the presence of heavy petroleum, a large diameter flight auger was used to drill out residual contamination. The project value was \$750,000.

Brian Viggiano PG

Senior Geologist · 19 Years of Experience · San Bernardino, California

Compton Redevelopment Project, Compton, California (Project Geologist, 2007)

Brian performed site remedial investigation and cleanup of soil chemically impacted with petroleum, PCBs, chlorinated solvents, and heavy metals including hazardous waste concentrations of lead and groundwater impacted with chlorinated solvents. Mitigation of impacted soil included appropriate remedial excavations and corrective grading plans. Groundwater remedy included SVE with air sparging and in-situ chemical oxidation using potassium permanganate. All work was completed under State of California oversight. The project value was \$2,800,000.

Chlorinated Solvent Remediation, El Centro, California (Project Geologist, 2007)

Brian performed site remedial investigation and clean up of chlorinated solvent-impacted soil and groundwater. He designed and implemented feasibility tests which included in-situ chemical oxidation using potassium permanganate and hi-vacuum dual phase extraction. He also designed and implemented final Remediation approach using six-phase electrical resistance heating. The project value was \$1 million.

Kyle has more than 28 years of professional experience—17 of those years with Stantec—providing geotechnical and environmental consulting. During the course of his experience, he has been involved with a wide variety of geological and engineering projects. He has been in direct charge of quality control/quality assurance (QA/QC) work for Stantec and previous firms for geological, engineering geological, and environmental services primarily in California. Additionally, Kyle has been a primary contact for Stantec with many different clients (including multi-party actions) and regulatory bodies involving contracting, workplan approvals, site assessments and closures, permitting, remedial action, and litigation support. With regard to litigation services, Kyle has extensive experience providing expert witness testimony, second-party review, and litigation support and analysis.

Kyle's extensive experience includes assessment and remediation of property-specific and regional issues involving soil and groundwater contaminated with petroleum hydrocarbons, chlorinated solvents, heavy metals, pesticides, and PCBs.

He currently serves as the managing principal geologist in Stantec's Redlands, California office.

EDUCATION

Engineering Geology/Hydrogeology, California State University, Los Angeles, California, 1984

AS, General Science, Crafton Hills College, Yucaipa, California, 1975

BS, Geological Sciences, California State University, Long Beach, California, 1982

REGISTRATIONS

Certified Engineering Geologist #1271, State of California Issued 1985

Professional Geologist #4066, State of California Issued 1985

PROJECT EXPERIENCE

Bioremediation

Excavation and Treatment of Petroleum-Contaminated Soil

Kyle designed the excavation and treatment of 45,000 cubic yards of petroleum-contaminated soil. Soil treatment included utilizing vapor extraction, combined with bioremediation.

Chemicals & Polymers

Two Former Chemical Plants, Environmental Site Assessments and Remediation, Vernon, California

Mr. Emerson was part of the team for conducting Phase I and Phase II Environmental Site Assessments (ESA) and developing remedial action plans for two former chemical plant sites with 80-year industrial histories. Phase I ESAs used historical files, maps, aerial photographs, available documents, and data from public agencies and historical directories for identifying recognized environmental concerns. Extensive Phase II ESA survey activities aided in identifying below-grade structures such as vaults/USTs, as well as assessing the extent of influence and nature of the contamination. These investigations confirmed the presence of heavy metals, petroleum hydrocarbons, volatile organic compounds, polychlorinated biphenyls, radioactive materials, semi-volatile organic compounds, and polycyclic aromatic compounds in the soils for these sites. Specific areas of concern included former settling ponds, a bone yard, maintenance areas, transformer and substations, wastewater treatment facilities, and above-ground storage tank farms. A conceptual mode was developed for use in a health risk assessment and developed risk-based corrective actions to address potential health and environmental concerns. He assisted with the development and implementation of a remedial action plan, combined administrative controls, engineering controls, and active remediation; this resulted in the cost-effective return of one site to active use, and is reducing health risks to occupants and the public at the second site.

CONFIDENTIAL: Aerospace Adhesives and Coatings Plant, Glendale, California

Mr. Emerson was part of the team that conducted feasibility studies to evaluate remedial alternatives for remediation of chlorinated VOCs, 1,4 dioxane, and hexavalent chromium (CrVI) in soil, soil vapor, and groundwater. Feasibility studies included groundwater pump testing, benchscale column testing to evaluate in situ alternatives for reducing CrVI to the less mobile CrIII valence state, soil vapor extraction, capping, and excavation. Field pilot studies were performed to evaluate the efficiency of various CrVI reductants including the use of ferrous sulfate, calcium polysulfide, emulsified oil, and fructose. Extensive multi-depth soil vapor testing was conducted to evaluate the distribution of VOCs in the subsurface and to support vapor intrusion risk assessment. Feasibility studies were completed in 2008. Remedial actions are expected to be completed in 2011.

Condition Assessments

Assessment and Mitigation of Manufacturing Facility

Kyle managed the assessment and mitigation of an ammunition manufacturing facility covering 1,100 acres in a complex geologic environment. The contaminants involved red and white phosphorous, TNT, chlorinated solvents, solid wastes, and live ordinance.

Soil Contamination Assessment Supervision and Management

Kyle managed and supervised soil contamination assessment and in-situ remediation of heavy metals involving chromium, cadmium, nickel and zinc by chemical fixation to depths in excess of 40 feet below ground surface beneath existing structures within several manufacturing facilities.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Litigation Support and Expert Testimony

Kyle provided litigation support and expert testimony on more than 20 separate projects involving service stations, chlorinated solvent cases, heavy metal, and semi-volatile releases.

Corporate / Office

Commercial Developer - Environmental Remediation of Former Dry Cleaners, El Centro, California

Mr. Emerson was responsible for assessments and remediation at this former dry cleaners which released the dry cleaning chemical tetrachloroethene (PCE) to the ground and underlying groundwater. The work included initial site assessment, agency interaction and negotiations with the California Regional Water Quality Control Board (CRWQCB), and Colorado Basin Region human health risk assessment (HHRA), design and implementation of remedial investigations, feasibility studies, remedial action plans, and implementation of remediation in mitigating chlorinated solvent contamination in vadose and saturated zones at concentrations indicative of DNAPL. The results of the completed remediation, as well as continued confirmation sampling and monitoring, allowed the CRWQCB to issue site closure in 2008. The site has since been redeveloped into a new commercial development.

Environmental Assessments

Siting Studies

Kyle performed initial siting studies for potential Class I, II, and III landfills. The project included detailed geologic mapping, hydrogeological studies, and permeability studies of caps and liners.

Environmental Site Remediation

Assessment and Remedial Design, California (Project Supervisor)

Kyle supervised the assessment and remedial design of a system to eliminate salt brine contamination in shallow perched water horizons in the Yucaipa, San Bernardino, and Riverside areas of southern California.

Design and Installation of Recovery Systems*

Kyle designed and installed numerous free-product recovery systems that successfully recovered product. One of the sites contained product up to 11-feet thick covering more than three city blocks. The dissolved phase had affected a multi-aquifer system and a public drinking water system.

Geophysical Characterizations*

Kyle performed and supervised numerous geophysical characterizations to determine the extent of old landfills. He provided classification studies, landfill gas monitoring, removal verification during grading, methane collection and mitigation plans, permitting, and closure plans.

Domestic Landfill Development*

Kyle designed and supervised the dynamic consolidation of a domestic landfill for development. He used this process to minimize expected settlement to overlying structures. Kyle designed commercial developments on closed landfills that involved complex methane collection and monitoring systems and building settlement controls.

* denotes projects completed with other firms

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Clay Borrow Site Studies

Kyle performed more than 10 separate clay borrow site studies for determining sources of material to cap landfills; ranged from a 20-acre dry lakebed to a 450-acre parcel in complex folded marine sediments.

Assessment, Clean Up, and Regulatory Support Management, Santa, Monica (Project Manager)

Kyle managed the assessment, clean up, and complex regulatory support of a PRP site in an MTBE case (Charnock subbasin). His work involved more than 20 environmental professionals working full time for two years to complete the assessment and clean up mandated by the regulatory agencies.

Hazardous Waste

San Gabriel Valley Superfund Site, Remediation & Closure of Multiple Source Areas, Industry, California

Mr. Emerson performed feasibility studies to evaluate appropriate and relevant remedial alternatives to mitigate constituents of concern in five AOCs contaminated with chlorinated hydrocarbons, heavy metals, petroleum fuel, and cutting oils. Ultimately, a combination of remedial alternatives was implemented that included large-diameter auger excavation to 45 feet to minimize impacts on facility operations, vapor extraction, vapor intrusion risk assessment, deed restriction, and monitored natural attenuation. At the completion of remedial actions, confirmation soil, soil vapor, and groundwater sampling were conducted and followed with risk assessment to demonstrate that remedial objectives had been achieved. No further action was recently granted by the US EPA and Los Angeles Regional Water Quality Control Board.

Mixed-Use

Port of San Diego Rohr Facility, Chula Vista, California

Mr. Emerson assisted in a detailed subsurface assessment of the Rohr facility. The intent of the assessment was to evaluate the 40-acre former aircraft part manufacturing facility for acquisition by the Port of San Diego for redevelopment into a business park and entertainment complex. The assessment identified the presence of soil, soil vapor, and groundwater impacts by petroleum hydrocarbons, VOCs, heavy metals, PCBs, and semi-volatile organic compounds. He utilized many sampling techniques to assess the limits and concentrations of contaminants in the subsurface. Ultimately, the team was able to develop a cost estimate for potential remedial action cost associated to corrective action to allow redevelopment.

Master Planned Commercial/Residential Redevelopment Project, Whittier, California (Project Manager)

Kyle oversaw the assessment of 26 contiguous properties that are part of a 21-acre master planned commercial/residential redevelopment project. The properties included industrial facilities, platting lines, fuel USTs, and metal processing plants, among others. The estimated cleanup costs are approximately \$2 million.

* denotes projects completed with other firms

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Multi-Unit / Family Residential

Residential Development Assessment, Ventura, California (Project Director)

Kyle directed an assessment of a 40-acre former agricultural property proposed for residential development. Pesticides were identified above hazardous waste levels and preliminary remediation goals established by the U.S. Environmental Protection Agency. Through corrective grading methods and onsite placement of the pesticide impacted soils, all material were re-used on site without offsite disposal. The overall cost savings for the client was more than \$1 million. Total cost was less than \$250,000 for all necessary activities.

Oil & Gas

Oil Field Site Assessments*

Kyle performed site assessments at oil field leases involving refineries, bulk storage areas, piping systems and wellhead, and drilling mud pit contamination.

Environmental Protection Agency Superfund Action, Culver City, California (Project Manager)

Kyle served as the project manager representing a major oil company in the assessment, remedial action, and litigation support in a multi-party contamination case affecting a City water supply. The assessment involved more than 250 continuous core borings up to 100 feet, as well as extensive remedial actions. The total cost for all related activities was \$22 million. The case is settled and the closure of the site is pending.

Project Management

Liability and Property Management Consulting Services

Kyle is providing liability and property management consulting services to more than 10 medium to large property development firms in the US. His work involves property transaction assessments, contract review, acquisition guideline development, liability management evaluation, insurance acquisition, and strategic planning.

Residential Development

Environmental Development Management and Review (Project Manager)

Kyle manages and reviews environmental development issues for a large residential developer specializing in development of contaminated industrial properties by providing innovative solutions in developing contaminated properties for residential use through risk assessment, engineering, and administrative and property development controls.

Site Management and Remediation

Design and Implementation of Biodegradation Programs*, California

Kyle designed and implemented one of the first in-situ biodegradation programs in California; it involved 50,000 cubic yards of diesel-contaminated soils, and groundwater to depths of 70 feet below ground surface.

* denotes projects completed with other firms

Soil and Groundwater Remediation Systems

Soil and Groundwater Contamination Assessments and Mitigation*, California (Project Manager)

Kyle managed numerous chlorinated solvent soil and groundwater contamination assessments and mitigation programs in southern California. The projects involved releases that impacted soil and groundwater to depth of groundwater more than 700 feet in multi-aquifer systems. One case involved with plume dimensions more than 1 mile from the source affecting residential properties.

Soil and Groundwater Assessment and Remediation Programs*

Implemented hundreds of soil and groundwater assessment and remediation programs at various service station facilities in Southern and Northern California, and Nevada. Work involved assessment, remedial design, installation, maintenance and monitoring. Closure has been received on a majority of these sites.

Assessment and Remediation Management*

Kyle managed the assessment and remediation of soil and groundwater manufacturing at dry cleaning facilities contaminated with chlorinated solvents.

Warehouse / Light Industrial

Glendale Redevelopment Project, Glendale, California (Project Manager)

Kyle managed the assessment and remedial actions during the redevelopment of an industrial property. The project involved the demolition of a historic manufacturing facility and a commercial dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. Remedial actions involved excavation by pattern drilling and off site disposal along with removal of former USTs. The total cost of remediation and assessment was \$450,000.00.

Compton Redevelopment Project, Compton, California (Project Manager)

Kyle is serving as project manager for the assessment and remedial actions for a large redevelopment project. The project involves the redevelopment of a historic manufacturing facility and a former dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. The industrial facility was also associated with significant volumes of buried waste that required removal and disposal. These wastes also included the chemical referenced above, as well as PCBs and heavy metals. Remediation has included excavation, vapor extraction, and chemical fixation. The total cost of this project has been \$2.8 million to date.

* denotes projects completed with other firms

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2021 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
GERALD HOBBS PROPERT Database: RESPONSE, Date of Government Version: 01/25/2021 Status: Certified Facility Id: 60000688	7194 CONEJO DRIVE	NNE 1/2 - 1 (0.539 mi.)	50	268

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that

EXECUTIVE SUMMARY

there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Scoring: 2

Summary Details:

Conditions at proposal October 15, 1984): Norton Air Force Base covers approximately 2,036 acres 58 miles east of Los Angeles near the City of San Bernardino, San Bernardino County, California. It is in a low-lying alluvial plain surrounded on the north and east by the San Bernardino Mountain Range. The base began operations in 1942 and has served as a major overhaul center for jet engines and the general repair of aircraft. Since 1962, the facility has served as a Military Airlift Command Base. In addition, Norton formerly had the responsibility for providing maintenance and logistics for liquid-fuel intercontinental ballistic missiles. Past hazardous waste management practices may have contributed to existing contamination problems throughout the base. The practices include burial of drums and other unspecified materials; disposal of waste oils, solvents, and paint residues into landfills, unlined pits, ponds, and drying beds; storage in leaking underground tanks; and spills of AVGAS, oils, solvents, PCBs, and acidic plating solutions. Industrial solvents have been used extensively on the base. Unknown quantities of spent solvents were disposed of in several base landfills. A well on the base has been contaminated with trichloroethylene (TCE). The well water is currently being used in a blended system and is sampled quarterly to ensure that TCE is below the California State action level. The water is used by approximately 11,000 people who live and/or work on the base. Norton Air Force Base is participating in the Installation Restoration Program (IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from hazardous materials. The Air Force has completed Phase I (records search). Phase II remedial investigation) is underway. Status July 22, 1987): In November 1986, the California Regional Water Quality Control Board issued a Cleanup and Abatement Order requiring Norton to clean up one on-base area, the Industrial Waste Water Treatment Plant Sludge Drying Beds. Phase II-Stage 2 of the IRP was completed in December 1986. It focused on characterization of the contamination at 18 on-base areas. More than 22 areas have been identified to date. Additional areas will be studied in Stage 3, scheduled to begin in the fall of 1987. Within the boundaries of this Federal facility, there are areas subject to the Subtitle C corrective action authorities of the Resource Conservation and Recovery Act (RCRA). However, no such areas were included in scoring this specific site. Therefore, this Federal facility site is being placed on the Federal section of the NPL under the NPL/RCRA policy announced on September 8, 1983 (48 FR 40662).

S110326701

Violation Description: 6.95, Section(s) 25508.1(a)-(f)
Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: OBSERVATION: Hazardous materials were observed on site that are not listed in the most current CERS inventory or are listed in lesser quantities. The Site Map must show the storage locations of propane tanks & diesel fuel drums, locations of all emergency response equipment (fire extinguishers/eye wash stations), and locations of all storm/sewer drains on site. The emergency response plan currently lists 909-386-8401 as the emergency contact number for the local CUPA; this number must be changed to either 909-386-8425 or 800-33-TOXIC. CORRECTIVE ACTION: Submit a signed statement that updated Business Plan elements have been submitted into CERS.

Violation Division: San Bernardino County Fire Department

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

APNS: 0273-211-07, 027321107
Description: The property consists of a 20,000 square foot area and is identified by Assessor's Parcel number 0273211070000. The Site is a private home, owned by the Respondent. The Site is located in an area that is predominantly residential. The Respondent conducted precious metal extraction from circuit boards at the subject site. The Respondent poured the resulting liquid waste into a depression in the backyard, about 12 inches in diameter and about 4 inches deep. On October 6, 2005, Mr. Gary Shapiro and Mr. Roy Yeaman of DTSC's Emergency Response Branch conducted a Site visit. They also met with Mr. Greg Ziegler, of the San Bernardino County Health Hazardous Materials Division, and Mr. Gerald Hobbs, the Respondent. The DTSC contractor,

EDI (Represented by J. McCreery and J. Novoa) excavated around the depression to a depth of 18 inches. The hole was about 16 inches in diameter and 18 inches deep. The excavated soils were placed in a 55-gallon drum. Two buckets of waste were collected and placed into a 5- gallon drum. The buckets were placed inside another 55-gallon drum with dirt from the other drum.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/29/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/29/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2021

Next Scheduled EDR Contact: 10/11/2021
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/27/2021

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 10/05/2020
Date Data Arrived at EDR: 02/17/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Northwest Map: Version Date:	5630643 SAN BERNARDINO NORTH, CA 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: GRANGEVILLE

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 9 Min: 7.4
2	11 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 9 Min: 7.4

Soil Map ID: 2

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 1CD1-4932-A62E

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Stantec (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Dear Requestor:

On July 13th, 2021, the Department of Toxic Substances Control (DTSC) received your email of July 13th, 2021 requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You will find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 714.484.5336 or via email at CypressFileRoom@dtsc.ca.gov.

Sincerely,

Jone Barrio

SUBJECT: CERTIFIED RECORD SEARCH FINDINGS
752 TIPPECANOE AVENUE, SAN BERNARDINO, CALIFORNIA
APN #: 0278-191-12-0000

This is to confirm that the OFM Hazardous Materials Division (HMD) has searched its records for any file(s) pertaining to the subject property, as described in your request, and finds that no records exist for the above site description(s).

Records maintained by OFM-HMD date back to early 1980's. Records searched include:

- facilities with hazardous waste generator permits, hazardous materials handler permits, underground storage tank permits, universal waste permits, tiered permits, EPCRA facilities, RMP facilities, Cal ARP facilities, and/or waste recycling generators, including inactive and/or out of business records, as well as non-permitted facility actions;
- logs of permits issued for the removal, installation, and/or modification of underground storage tanks;
- records and databases pertaining to illicit dumping, spill reports and release notifications, and complaints;
- incidents responded to by the hazardous materials emergency response team;
- and sites undergoing remediation for contaminated soil and/or groundwater.
