Staff Geologist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) report of the property located at 5770 Industrial Parkway, in the City and County of San Bernardino, California (the “Property”), on behalf of Dedeaux Properties, LLC (the “Client”). The work was performed according to the Master Services Agreement between Dedeaux Properties, LLC and Stantec. Dedeaux Properties, LLC (the “User”) has been designated as the User of this report.

The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) Designation E 1527-13, and All Appropriate Inquiry (AAI) as defined by the US-EPA in Title 40 of the Code of Federal Regulations, Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM or AAI practice are described in Section 2.3.

The Property consists of approximately 12.45 acres of land developed with one approximately 35,000 square foot building occupied by multiple wood pallet manufacturing and sales companies. Surrounding properties are a mix of vacant land, commercial, and industrial properties including a large-scale propane gas sales facility. Railroad tracks are located adjacent to the south. A Property location map is illustrated on Figure 1. A Property map illustrating the main features of the Property is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

The Property was undeveloped until the current building was constructed in circa 1982. Between 1982 and 2018, the Property was occupied by Fred G Walter & Son machine shop which specialized in mining industry equipment fabrication and repairs. Fuel and waste oil underground storage tanks (UST), abrasive blasting equipment, and a pressure washing area with an aboveground clarifier were used on-site. Hazardous materials utilized on-site included compressed gases, grease, oil, diesel fuel, solvents, and parts cleaner. Multiple notices of violation were issued for management of hazardous waste and use oil and waste spills.

One 5,000-gallon diesel UST and one 5,000-gallon gasoline UST were located on the southwest side of the building and one 1,000-gallon waste oil clarifier/sump were located adjacent to the southwest corner of the building. The USTs were installed in 1982 and removed in 1991. During the UST removal activities, excavation bottom and sidewall soil samples were collected by TetraTech from each tank pit. Based on elevated concentrations of total petroleum hydrocarbons (TPH) associated with the concrete waste oil sump, additional excavation was conducted. A total of 40 tons of petroleum impacted soil from around the former waste oil sump to a total depth of 18 feet below ground surface (bgs). TPH concentrations in confirmation samples of the final excavation ranged from non-detect to 400 parts per million on the northwest side of the excavation, closest to the building. Upon request for a closure letter, the San Bernardino County Fire Department issued a “no further action letter” on February 12, 2020 for the USTs and concrete waste oil sump.

A subsurface assessment was conducted in 2018 by Black Rock Geosciences which included one soil boring (B-1) adjacent to the pressure washing area and approximately 10 feet from the associated drain

SAN BERNARDINO, CALIFORNIA 92407

Summary

April 21, 2021

and three soil borings (B-2 through B-4) within the former UST area (not the area of the concrete waste oil sump). Samples were collected from boring B-1 from a hand auger at the 1.5-ft, 2.5-ft, and 5-ft bgs intervals and samples were collected from a direct-push drill rig from borings B-2 through B-4 from 5, 10, and 15-ft bgs.

Low levels of TPH as oil range up to 12 parts per million (ppm) where detected in all the samples analyzed. Trace levels of TPH as diesel and 1,2,3-trichlorobenzene were found in the sample from B-2. All detections in soil were below their respective screening levels. Black Rock Geosciences recommended no additional investigation. However, the scope of work performed by Black Rock Geosciences is not sufficient to evaluate the environmental condition of the Property because soil vapor data was not collected, and the soil boring locations were too far from the drain to assess whether a release occurred in the vicinity of the drain. Stantec recommends a subsurface investigation including soil vapor sampling to determine whether vapor intrusion has occurred at the Property and whether the area surrounding the drain has been impacted by petroleum hydrocarbons and volatile organic compounds..

The Cajon landfill is an unpermitted landfill that is located within 200 feet of the Property. Given the close proximity and potential for methane in the subsurface, the landfill is considered a REC to the Property. Stantec recommends collecting soil vapor samples on the Property to evaluate the potential methane impact to the subsurface from the nearby landfill.

The Newmark Groundwater Contamination Superfund Site encompasses 23 square miles and is located within the Bunker Hill Groundwater Basin. The groundwater plume extends beneath the Property. The source of the Newmark Groundwater Superfund Site is suspected to be located to the northwest and upgradient of the Property in the Camp Ono Army Base and Cajon Landfill. Halogenated organic chemicals including tetrachloroethene (PCE) and trichloroethene (TCE) have been found in the groundwater and the groundwater plume appears to continue beneath the Property. A monitoring well (CJ-11) is located in the northwestern corner of the Property. Sampling at this well between 1987 and 2006 indicates an increasing trend of PCE with an average concentration of 4.89 micrograms per liter (ug/L) which is below the maximum contaminant level (MCL) regulatory screening level of 5 ug/L. No sampling has occurred at this well since 2006.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of 5770 Industrial Parkway, in the City and County of San Bernardino, California, or the "Property." Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed the following evidence of recognized environmental conditions (RECs) in connection with the Property:

- **Adjacent Railroad Tracks.** Railroad tracks are located adjacent to the west-southwest of the Property. Herbicides are commonly applied to railroad alignments, and heavy metals associated with herbicidal application are commonly found in these areas. Should there be proposed redevelopment of the Property, Stantec would recommend collecting shallow soil samples along this Property boundary and submitting the samples to the laboratory for analysis of arsenic and lead. The need for sampling for these compounds is for protection of construction workers during development of the paths when exposed to dust. The second issue is the potential for off-Site

SAN BERNARDINO, CALIFORNIA 92407

Summary

April 21, 2021

removal of soil, which will require profiling by chemical analysis to determine the proper location for disposal.

- **Former Property Features.** The Property received a “no further action letter” from the San Bernardino County Fire Department on February 12, 2020 for the former 5,000-gallon diesel UST, 5,000-gallon gasoline UST, and 1,000-gallon waste oil clarifier/sump. However, no soil vapor data has been collected to evaluate whether soil vapor beneath the Property has been impacted by the former USTs and clarifier/sump or the pressure washing station and drain. Therefore, these features are considered a REC to the Property.
- **Groundwater Plume Associated with Newmark Superfund Site.** The Newmark Groundwater Contamination Superfund Site encompasses 23 square miles and is located within the Bunker Hill Groundwater Basin. The groundwater plume extends beneath the Property. The groundwater contamination impacts the drinking water resources in the region. Chemicals of concern (COCs) include tetrachloroethylene (PCE) and trichloroethylene (TCE). The groundwater plume is considered a REC to the Property. Stantec recommends collection of soil vapor samples to evaluate whether soil vapor beneath the Property has been impacted by the groundwater plume.
- **Cajon Landfill.** The Cajon landfill is an unpermitted landfill that is located within 200 feet of the Property. Given the close proximity and potential for methane in the subsurface, the landfill is considered a REC to the Property. Stantec recommends collecting soil vapor samples on the Property to evaluate the potential methane impact to the subsurface from the nearby landfill.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform All Appropriate Inquiry (AAI) into the past ownership and uses of the Property consistent with good commercial or customary practice as outlined by ASTM International (ASTM) in “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”, Designation E1527-13. “All Appropriate Inquiry” (AAI) is the process for evaluating a property’s environmental conditions for the purpose of qualifying for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including recognized environmental conditions (“RECs”) of the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions (“HRECs”), and controlled recognized environmental conditions (“CRECs”) that may exist at a property. The term “recognized environmental conditions” means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

1. Due to any release to the environment;
2. Under conditions indicative of a release to the environment; or
3. Under conditions that pose a material threat of a future release to the environment.

ASTM defines a “HREC” as a REC that has occurred in connection with a property, but has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional (EP) must determine whether the past release is a REC when the current Phase I ESA is conducted (e.g., if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM defines a “CREC” as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The presence of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor occurrences of contamination that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies. ASTM also considers the potential for a business environmental

SAN BERNARDINO, CALIFORNIA 92407

Introduction
April 21, 2021

risk (BER), defined as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations.

The work was performed according to the Master Services Agreement between Dedeaux Properties, LLC and Stantec. Dedeaux Properties, LLC (the “User”) has been designated as the User of this report. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or EP is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. “Reasonably ascertainable” means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

2.1 PROPERTY DESCRIPTION

The Property consists of approximately 12.45 acres of land developed with one approximately 35,000 square foot building occupied by multiple wood pallet manufacturing and sales companies. Surrounding properties are a mix of vacant land, commercial, and industrial properties including a large-scale propane gas sales facility. Railroad tracks are located adjacent to the south. An unpermitted landfill is reported within approximately 200 feet of the Property. A Property location map is illustrated on Figure 1. A Property map illustrating the main features of the Property is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

The Assessor Parcel Numbers (APNs) associated with the Property include 0266-041-22 and 0266-041-40.

2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

There were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

Introduction
April 21, 2021

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the client. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Property.

This report provides an evaluation of selected environmental conditions associated with the Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the Property's environmental condition.

The client did not provide or contract Stantec to provide recorded title records or search results for environmental liens or activity and use limitations encumbering the property or in connection with the Property. Stantec did not obtain historical records that document the property history in 5-year intervals, and this resulted in data gaps. Although this represents data gaps, these data gaps are not considered to impact the EPs ability to identify RECs unless stated as such. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions.

This report has been prepared for the exclusive use of the client identified herein and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

Project Specific limiting conditions are provided in Section 2.2.

The conclusions are based on the conditions encountered at the Property by Stantec at the time the work was conducted.

As the purpose of this report is to identify Property conditions which may pose an environmental risk, the identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment.

SAN BERNARDINO, CALIFORNIA 92407

Introduction
April 21, 2021

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations, or policies of Federal, state, provincial or local governmental agencies. It is recommended that issues raised by the report should be reviewed for the client by its legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an EP. The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in Appendix B.

3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of “All Appropriate Inquiries” into the Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	A completed user questionnaire was provided by Mr. Brandon Bank, Project Manager with Dedeaux Properties, LLC. Mr. Bank is not aware of an environmental cleanup liens and/or activity and land use limitations associated with the Property. Mr. Bank is not aware of any past use of the Property or current/former petroleum, chemical, or hazardous substances on the Property.
Environmental Liens or Activity Use Limitations	No	The User is not aware of any environmental liens or activity and land use limitations on the Property.
Previous Environmental Permits or Reports Provided by User	Yes	Previous reports provided by the User are summarized in Section 4.4.6.
Purpose of the Phase I ESA	Yes	Due diligence

The User provided information is included in Appendix C.

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the first developed use of the Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections

Topography:	The Property is located at approximately 1,670 feet above mean sea level (msl) with a general topographic gradient to the south-southwest (EDR, 2021).
Soil/Bedrock Data:	According to EDR, the vicinity of the Property is underlain by gravelly loamy sand and fine sandy loam (EDR, 2021).
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	Groundwater is reported at depths ranging from 120 to over 250 feet below ground surface (bgs) in the vicinity of the Property.
NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

4.1.1 Property Topography and Surface Water Flow

The Property is located at approximately 1,670 feet above mean sea level (msl) with a general topographic gradient to the south-southwest (EDR, 2021). Based on the topography, surface water on the Property infiltrates the ground surface or flows overland to the adjacent street and railroad right of way.

4.1.2 Regional and Property Geology

The Property is located within the San Bernardino Valley, which is bounded on the north by the San Bernardino Mountains and San Gabriel Mountains, on the south and east by the Badlands and Crafton Hills, and on the west by the San Jose Hills. The valley is underlain by several fault-bound structural blocks including the down-dropped San Bernardino Valley Block between the San Andreas and San Jacinto faults, in the area of the Property, and the down-dropped Perris Block between the Elsinore fault to the west, the Cucamonga fault to the north, and the San Jacinto fault to the east. The San Andreas Fault is located within a ½ mile of the Property.

4.1.3 Regional and Property Hydrogeology

The Property is located within the Bunker Hill Basin of the Santa Ana River watershed. Groundwater in the basin is recharged by streams and creeks that carry surface water from the nearby San Bernardino and San Gabriel Mountains, and from direct infiltration of precipitation into the surface alluvial deposits. Groundwater in the area occurs within the upper and lower alluvial sediments, and within the subjacent Pelona Schist bedrock northeast of the Property. Groundwater elevations fluctuate extensively due to municipal supply and pumping and heavy recharge from the nearby mountains.

Groundwater monitoring data published on the California Water Resources Control Board database website Geotracker (www.geotracker.waterboards.ca.gov) indicates that groundwater within the area of the subject property flows in a southeasterly direction within the sediment units. Groundwater is reported at depths ranging from 120 to over 250 feet below ground surface (bgs) in the vicinity of the Property. Observed historical fluctuations in local groundwater elevations are on the order of up to 220 feet. The sand and gravelly sands typically found in the area of the Property have excellent water-bearing and water-yielding characteristics.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix D.

Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. As described in 4.1.3, the inferred shallow groundwater flow direction is likely to be in the southeasterly direction. Observations about the Property and surrounding sites made during the Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Property

The Property was identified in the environmental database report as Fred Walter & Son in the FINDS, ECHO, SWEEPS UST, HIST UST, CA FID UST, RCRA NonGen / NLR, EMI, HAZNET, and HWTS environmental databases. Between 1982 and 2018, the Property was occupied by Fred G Walter & Son machine shop which specialized in mining industry equipment fabrication and repairs. Fuel and waste oil underground storage tanks (UST), abrasive blasting equipment, and a pressure washing area with an aboveground clarifier were used on-site. One 5,000-gallon diesel UST and one 5,000-gallon gasoline UST were located on the southwest side of the building and one 1,000-gallon waste oil clarifier/sump were located adjacent to the southwest corner of the building. The USTs were installed in 1982 and removed in 1991. Hazardous materials utilized on-site included compressed gases, grease, oil, diesel fuel, solvents, and parts cleaner. Multiple notices of violation were issued by San Bernardino County for

SAN BERNARDINO, CALIFORNIA 92407

Records Review
April 21, 2021

management of hazardous waste and use oil and waste spills. Previous subsurface assessments were conducted to evaluate the historical machine shop and are discussed in Section 4.4.6.

4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on adjacent and nearby sites to pose a REC, CREC, or HREC for the Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Property from a nearby site, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC]).

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Property. The basis for why each of the following listed databases creates a REC for the property is also provided.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Newmark Groundwater Contamination Bunker Hill Groundwater Basin San Bernardino, CA 92408	NPL, SEMS, US ENG CONTROLS, US INST CONTROLS, ROD, PRP	Beneath the Property	Yes
<p>The Newmark Groundwater Contamination Superfund Site encompasses 23 square miles and is located within the Bunker Hill Groundwater Basin. The groundwater plume extends beneath the Property. The groundwater contamination impacts the drinking water resources in the region. Chemicals of concern (COCs) include tetrachloroethylene (PCE) and trichloroethylene (TCE). There are three operating units (OU): Newmark, Muscoy, and Source. In August 2015, the EPA issued a final Interim Record of Decision (ROD) which included the following major components of the remedy: two extraction well networks and water treatment plants for the removal of site-related volatile organic compounds (VOCs) by granular activated carbon (GAC); monitoring wells; and institutional controls. All components of the final remedy for the Newmark and Muscoy OUs have been implemented and operations and maintenance has been underway since 2005. A monitoring well (CJ-11) is located in the northwestern corner of the Property. Sampling at this well between 1987 and 2006 indicates an increasing trend of PCE with an average concentration of 4.89 micrograms per liter (ug/L) which is below the maximum contaminant level (MCL) regulatory screening level of 5 ug/L. No sampling has occurred at this well since 2006. The groundwater plume is considered a REC to the Property. Stantec recommends soil vapor samples are collected to evaluate whether soil vapor beneath the Property has been impacted by the groundwater plume.</p>			
Cajon Landfill Institution Road and Cajon Boulevard San Bernardino, CA 92407	ENVIROSTOR; SEMS	Approximately 167 feet / west-northwest	Yes
<p>The landfill contains potential chemicals of concern including but not limited to asbestos containing wastes, chromium, lead, tetrachloroethene (PCE), 1,1,1,-trichloroethane, and vinyl chloride. According to the California CalRecycle Solid Waste Site Inspection website, the landfill is unpermitted with a closed operation. Semi-annual inspections are conducted with no reported violations. In the first semi-annual inspection of 2021, an area of concern was noted in the southwest area of the landfill where concrete pads directing water to drainage flues were observed cracked and with overgrown vegetation.</p>			

SAN BERNARDINO, CALIFORNIA 92407

Records Review
April 21, 2021

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Several flumes were found blocked inside with tumbleweeds. Methane gas monitoring was not conducted during this inspection. Given the close proximity to the Property, the landfill is considered a REC to the Property. Stantec recommends collecting methane samples on the Property to evaluate the potential impact to the subsurface from the nearby landfill.			
J.C. Penny Corporation, Inc. 5959 Palm Avenue San Bernardino, CA 92407	CERS HAZ WASTE, NPDES, San Bern. Co. Permit, CIWQS, CERS; RCRA-SQG	Adjacent to the NE	No
The facility is listed as a hazardous waste generator and chemical storage facility with no reported violations. The facility has a terminated storm water construction permit with no reported violations within 5 years. Given there is no reported release, this facility is not considered a REC to the Property.			

The remaining listings in the database search report, including listings of Orphan Sites, provided in Appendix D do not constitute a potential REC for the Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property:

4.3.1 California Geologic Energy Management (CalGEM)

Agency Name Contact Information	Finding
California Geologic Energy Management (CalGEM) Division 5816 Corporate Avenue, Suite 200 Cypress, CA 90630 Online database: https://maps.conservation.ca.gov/doggr/wellfinder/#/-/118.94276/37.12009/6 Date of contact: April 13, 2021	The California Department of Conservation Geologic Energy Management Division (CalGEM, formerly, the Division of Oil, Gas, and Geothermal Resources [DOGGR]) website was searched to identify the potential existence of oil and gas production wells within the vicinity of the Property. No oil or gas wells were located within the immediate vicinity of the Property. The closest well is located approximately 1.5 miles south of the Property and is listed as a dry hole leased by Ono (API 0407100107). Therefore, this well is not considered a REC for the Property.

SAN BERNARDINO, CALIFORNIA 92407

Records Review
April 21, 2021

4.3.2 Local Health Department

Agency Name Contact Information	Name	Finding
San Bernardino Environmental Health Services 385 North Arrowhead Avenue, 2 nd Floor San Bernardino, CA 92415 (800) 422-2283 Date of contact: April 8, 2021		Stantec submitted a records request for the Property to the San Bernardino Environmental Health Services on April 9, 2021. At the time of the preparation of this report no response has been received. Given the historical documents and other regulatory records provided, the lack of a response from this agency is not considered a significant data gap.

4.3.3 Department of Toxic Substances Control (DTSC)

Agency Name, Contact Information	Findings
Department of Toxic Substance Control (DTSC) Online database: https://www.envirostor.dtsc.ca.gov/public/ Date of contact: April 8, 2021	No records were available for the Property or adjoining facilities on the DTSC online database (Envirostor).

4.3.4 Regional Water Quality Control Board

California State Water Resources Control Board (RWQCB), Santa Ana Region 3737 Main Street, Suite 500 Riverside, CA 92501 (951) 782-4130 Online database: https://geotracker.waterboards.ca.gov/ Date of contact: April 13, 2021	Stantec searched the RWQCB's online database Geotracker for the Property address. There were no records available for the Property and/or adjoining properties. However, the Property is located within the limits of the plume associated with the Newmark Groundwater Contamination Superfund Site described in Section 4.2.2.
--	--

4.3.5 Fire Department

Agency Name Contact Information	Finding
San Bernardino County Fire Protection District 620 South E Street, San Bernardino, CA 92415 (909) 386-8401 Date of contact: April 8, 2021	Stantec submitted a public records request to this agency to review available records. The San Bernardino County Hazardous Materials Division identified multiple records in connection with the site address. At the time of the preparation of this report Stantec paid for the records but was still awaiting receipt. Should any pertinent information become available Stantec will issue an addendum to this report. However, based on the historical reports and documents available, this is not a significant data gap.

Records Review
 April 21, 2021

4.3.6 Local Building and/or Planning Department Records

Agency Name, Contact Information	Findings
City of San Bernardino Building & Safety 201 N E Street Unit B San Bernardino, CA 92401 Online Database: http://www.ci.san-bernardino.ca.us Date of contact: April 8, 2021	Stantec searched for available permits on the City of San Bernardino Building & Safety online database. Records available included a Fire Department Permit dated October 15, 1999 for welding; a certification of payment of sewer capacity fees dated October 14, 1991; and a building permit to install a 400-ft sewer line and fill-in a septic tank dated November 25, 1991. No records of environmental concern were observed.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

Land title records, deeds, environmental liens, and activity and use limitation documentation was not provided by the User, and public records were not searched by Stantec. A specific search for environmental liens and activity and use limitations was not included in the scope of work for this ESA. However, based on information obtained from the User and the Environmental Data Resources (EDR) Radius Map Report, no evidence of environmental liens recorded against the Property was found. In addition, according to the EDR-provided information for the subject Property, no evidence of institutional controls, land use restrictions and/or engineering control requirements recorded against the Property was reported.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

Year	Scale	Observations, Property and Adjoining Properties
1930 1938	1=500	The Property and surrounding land appear to be vacant. Railroad tracks and a roadway appear adjacent to the west-southwest. A road appears adjacent to the north.
1949 1953 1959	1=500	The Property and surrounding area remain vacant land. A roadway appears to the east-northeast. Commercial development appears to the south.
1966 1968 1975	1=500	The Property and surrounding area remain vacant land. A small dirt circular road appears in the southeastern portion of the Property. Small commercial structures appear to the northeast.

Records Review
 April 21, 2021

Year	Scale	Observations, Property and Adjoining Properties
1985 1989 1990 1995 2002 2005	1=500	The northern portion of the Property remains vacant land. The current warehouse building and associated asphalt parking lot appear in the southern portion of the Property. Dirt roads appear to the east-northeast.
2009 2012 2016	1=500	The Property appears similar to the previous photographs. A large commercial building appears beyond a vacant lot to the south.
2016	1=500	The Property appears similar to the previous photographs. The road to the north has been realigned to incorporate an overpass. The roadway to the east has been realigned to provide additional land to the northern portion Property. Grading for a large commercial building to the east-northeast appears beyond the road.

Name of aerial photograph source: EDR, 2021

4.4.3 City Directories

Stantec retained a third party to research available reverse city directories for the Property, in approximately five-year intervals. The Property address was listed as Fred G Walter & Son between 1994 and 2017. There were no listings for the adjoining properties. The complete city directory listing is provided in Appendix E.

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Property uses.

Stantec requested fire insurance maps from EDR; however, no coverage exists for the Property. The Sanborn® Map Search Report indicating “no coverage” is presented in Appendix E.

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-minute Topographic Maps of the Devore and San Bernardino North, California Quadrangle (scale 1:24,000) to help identify past Property usage and areas of potential environmental concern. No RECs were noted during our review of the topographic maps. Copies of the historical maps are provided in Appendix E. The following table summarizes the maps reviewed and our observations.

SAN BERNARDINO, CALIFORNIA 92407

Records Review
April 21, 2021

Year	Scale	Observations, Property and Adjoining Sites
1896 1898 1901	15-minute, 62500	The Property and surrounding area appears to be vacant land. Depressions appear adjacent to the east-northeast and south. Railroad tracks appear No structures or indicators of potential RECs were depicted on the map.
1936 1941 1942	7.5-minute, 31680 and 7.5-minute, 50000	The Property and surrounding area appear similar to the previous map. A roadway and a dirt road appears in the northern and eastern portions of the Property, respectively.
1954 1966/1967 1973	7.5-minute, 24000	The Property and surrounding area remain vacant land and appear similar to the previous maps. Railroad tracks and Cajon Boulevard/Route 66 appear adjacent to the west-southwest. A gravel pit appears to the north. The Cajon Wash and a Levee appears to the west.
1975 1980	15-minute, 50000 and 7.5-minute, 24000	The Property and surrounding area appear similar to the previous map. A roadway appears adjacent to the east-northeast.
1988 1996	7.5-minute, 24000	The current commercial structure appears on the southern portion of the Property. No other structures are the Property or adjoining area.
2012	7.5-minute, 24000	No structures or details are depicted. Roadways appear to be in their current configuration.

Name of maps and source: EDR, 2021

4.4.6 Other Historical Sources

The User provided the historical following reports for the Property.

Phase I Environmental Audit, Parcel 0266-041-40, dated May 2001, prepared by Winslowe Environmental Corporation.

The focus of the report was on the northwestern parcel of the Property which was a vacant lot. The report did not identify any RECs associated with the parcel.

Phase I Environmental Assessment Report, 5730 and 5770 Industrial Parkway, Orswell & Kasman, Inc., March 27, 2018

The report was prepared for the southeastern parcel of the current Property and the adjacent vacant parcel to the southeast. Poor housekeeping and evidence of leakage from the chemical drum/storage area were observed in the photographs. The following RECs were identified:

- The former Fred G. Walter & Son Machine shop stored and used large quantities of oils and lubricants and generated hazardous waste in the form of waste oil, waste filter cake from the wastewater treatment recycling system, and waste abrasive material.

SAN BERNARDINO, CALIFORNIA 92407

Records Review

April 21, 2021

- The power wash station located in the southwest corner of the building near the floor drain was heavily caked and stained with grease, oil, and oily wash water.
- The two former USTs and clarifier were identified as a REC.

Orswell & Kasman, Inc., recommended sampling in the area of the caked grease and heavy staining around the power wash station.

Phase II Environmental Soils Investigation, 5730 and 5770 Industrial Parkway, LGC Geo-Environmental, Inc./Black Rock Geosciences, May 10, 2018.

The soil investigation included one soil boring (B-1) adjacent to the pressure washing area and approximately 10 feet from the drain and three soil borings (B-2 through B-4) within the former UST area (not the area of the concrete waste oil sump). Samples were collected from boring B-1 from a hand auger at the 1.5-ft, 2.5-ft, and 5-ft bgs intervals and samples from a direct-push drill rig from borings B-2 through B-4 from 5, 10, and 15-ft bgs.

No visual impacts were identified, therefore only the 1.5-ft bgs sample from boring B-1 was analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015B and lead by EPA Method 6010. The 15-ft bgs sample from borings B-2 through B-4 were submitted for TPH by EPA Method 8015B and volatile organic compounds (VOCs) by EPA Method 8260B.

Low levels of TPH as oil range up to 12 parts per million (ppm) were detected in all the samples analyzed. Trace levels of TPH as diesel and 1,2,3-trichlorobenzene were found in the sample from B-2. All detections were below their respective screening level. No additional investigation was recommended.

Phase I Environmental Assessment Report, Subject Property Located at 5770 Industrial Parkway, San Bernardino, California 92407, APNs 0266-04-22 and 0266-041-40, dated February 25, 2020, prepared by Waterstone Environmental, Inc.

The Phase I ESA was conducted for Birtcher Development. The Property was occupied by multiple wooden pallet manufacturing and sales companies. Waterstone Environmental, Inc. (Waterstone) identified the following RECs and environmental conditions associated with the Property and off-site:

- Historical PCE use at the Property (between 1999 and 2001) and a documented history of poor housekeeping in chemical drum and waste storage areas along the southwestern side of the building was considered a potential Vapor Encroachment Condition (pVEC). Lack of soil vapor data and the distance between Sample B-1 from the drain feature (approximately 10 feet) was considered a data gap.
- Two former 5,000-gallon USTs (gasoline and diesel fuel) and one 1,000-gallon waste oil concrete sump were removed from the Property in 1991 and were considered a HREC. TetraTech excavated 40-tons of TPH-impacted soil from the former waste oil sump during the removal activities. The San Bernardino County Fire Department issued a “no further action letter” dated February 12, 2020.

SAN BERNARDINO, CALIFORNIA 92407

Records Review

April 21, 2021

- Minor staining was observed on the asphalt surface of the Property from a plastic tote containing diesel fuel.
- The Property is located within the bounds of the groundwater plume associated with the Newmark Groundwater Contamination Superfund site, which is impacted with PCE and TCE. The source of the plume is located northwest of the Property and continues underneath the Property. Due to the historical use of PCE at the Property, there is a potential for the owner/responsible party to receive a notice to conduct investigations and to participate in the RP group for the Superfund site.

Waterstone recommended that a limited soil vapor survey be conducted to evaluate the former chemical drum and waste storage area, former pressure wash floor drain area, and former UST and waste oil sump area prior to redevelopment. Waterstone also recommended a soil management plan to be used during demolition and grading to address any potential issues associated with minor chemical spills from historical and recent operations. However, the subsurface investigation was not conducted.

5.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Ms. Debbie Hernandez, Staff Geologist with Stantec on April 12, 2020. Access to the Property was provided by Mr. John Morrissey, Senior Associate with MGR Real Estate. Stantec was accompanied by Mr. Morrissey during the Property visit. Figure 2 provides information about the Property and adjoining sites and the location of potential areas of environmental concern. Photographs collected during the Property visit are included in Appendix A.

5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Property boundary.
- Traverse transects across the Property.
- Traverse the periphery of all structures on the Property.
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces.

Weather conditions during the visit to the Property were clear and sunny. There were no weather-related Property access restrictions encountered during the reconnaissance visit.

5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property is located in the southeast corner of Palm Avenue and Industrial Parkway. The Property entrance is accessible via Industrial Parkway. The surrounding areas were observed as industrial and commercial warehouses.
Property Operations.	The Property is a mix of vacant land and an industrial warehouse where wooden palettes are recycled and manufactured.
Structures, Roads, Other Improvements:	A paved road was accessible towards the vacant portion of the Property. Asphalt covered the adjacent parking and storage areas of the warehouse.
Property Size (acres):	Approximately 12.45 acres
Estimated % of Property Covered by Buildings and/or Pavement:	~40%
Observed Current Property Use/Operations:	Industrial warehouse
Observed Evidence of Past Property Use(s):	None observed
Sewage Disposal Method (and age):	San Bernardino Municipal Water Department

Site Reconnaissance
 April 21, 2021

Potable Water Source:	San Bernardino Municipal Water Department
Electric Utility:	Southern California Edison

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec’s observations during the Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	None observed
Drums (≥ 5 gallons):	Forklift maintenance materials were observed in the southern most employee break room (Photo #14)
Strong, Pungent, or Noxious Odors:	None detected.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	None observed.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

5.4 INTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of the building interiors at the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
Heating/Cooling Method:	Ceiling fans and vents
Surface Stains or Corrosion:	None observed.
Floor Drains and Sumps:	A nonoperating drain was observed in the area of the sump UST area (Photo #22)
Other Interior Observations:	None observed.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	None observed.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	None observed.
Solid Waste Disposal:	Multiple trash receptacles were observed throughout the Property as used by the tenants.
Potential Areas of Fill Placement:	No mounds, piles, or depressions suggesting the placement of fill material were observed on the Property.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	Stormwater is expected to infiltrate the exposed surface or drain towards the south following the natural topography.
Wells:	A monitoring well (CJ-11) was observed in the northwest corner of the Property (Photo #3 and #4). This monitoring well is associated with the Newmark Groundwater Contamination Superfund Site discussed above.
Septic Systems:	No visible evidence of the existence of a septic system was observed.
Other Exterior Observations:	None.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	A concrete pad and former borings were observed in the southern part of the Property. Mr. John Morrissey confirmed the location of the former UST and the previous Phase II activities conducted in the area.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of ASTs, was discovered during the site reconnaissance.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining sites:

NORTHEAST	Industrial Parkway is located adjacent to the northeast beyond which is the JCPenney distribution center.
SOUTHEAST	A vacant lot with propane tank storage beyond which is a large warehouse for DSC Logistics.
SOUTHWEST	A railroad line and Cajon Boulevard/Route 66 are located immediately to the southwest beyond which is a large warehouse.
NORTHWEST	Palm Avenue is located adjacent to the northwest beyond which is vacant land and two large aboveground water storage tanks.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining sites providing indications of past use and activities, if any, are described below.

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds and lagoons on adjoining sites:

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	The topography of the Property was relatively flat with a slight slope to the south. The Property adjacent to the north was observed at a higher elevation.
---	---

Interviews
April 21, 2021

6.0 INTERVIEWS

Stantec conducted interviews with the following individuals:

Name and contact information	Relationship to Property	Key findings:
John Morrissey, Senior Associate with MGR REAL Estate, 909-608-2165	Property Owner Representative	Mr. Morrissey stated that four tenants rent out the warehouse and all operate as a palette recycling/manufacturing company. Mr. Morrissey is aware of a monitoring well on the vacant lot. Mr. Morrissey is aware of a Phase II that was performed approximately 2 years ago assessing the former UST and sump.

7.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and a Property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions.

- The Property was undeveloped until the current building was constructed in circa 1982. Between 1982 and 2018, the Property was occupied by Fred G Walter & Son machine shop which specialized in mining industry equipment fabrication and repairs. Fuel and waste oil underground storage tanks (UST), abrasive blasting equipment, and a pressure washing area with an aboveground clarifier were used on-site. Hazardous materials utilized on-site included compressed gases, grease, oil, diesel fuel, solvents, and parts cleaner. Multiple notices of violation were issued for management of hazardous waste and use oil and waste spills.

One 5,000-gallon diesel UST and one 5,000-gallon gasoline UST were located on the southwest side of the building and one 1,000-gallon waste oil clarifier/sump were located adjacent to the southwest corner of the building. The USTs were installed in 1982 and removed in 1991. As part of the UST and clarifier/sump removal, TetraTech removed a total of 40 tons of petroleum impacted soil from around the former waste oil sump to a total depth of 18 feet below ground surface (bgs). The San Bernardino County Fire Department issued a “no further action letter” on February 12, 2020 for the USTs and concrete waste oil sump.

A subsurface assessment was conducted in 2018 by Black Rock Geosciences which included one soil boring (B-1) adjacent to the pressure washing area and approximately 10 feet from the associated drain and three soil borings (B-2 through B-4) within the former UST area (not the area of the concrete waste oil sump). Samples were collected from boring B-1 from a hand auger at the 1.5-ft, 2.5-ft, and 5-ft bgs intervals and samples from a direct-push drill rig from borings B-2 through B-4 from 5, 10, and 15-ft bgs.

Low levels of TPH as oil range up to 12 parts per million (ppm) were detected in all the samples analyzed. Trace levels of TPH as diesel and 1,2,3-trichlorobenzene were found in the sample from B-2. All detections were below their respective screening level. No additional investigation was recommended. This scope of work is not considered sufficient due to the lack of soil vapor data and distance of the boring location to the pressure washing station drain.

The former USTs are considered a REC; however, no soil vapor data has been collected to evaluate whether soil vapor beneath the Property has been impacted by the former USTs and clarifier/sump.

SAN BERNARDINO, CALIFORNIA 92407

Evaluation
April 21, 2021

- Railroad tracks are located adjacent to the west-southwest of the Property. Herbicides are commonly applied to railroad alignments, and heavy metals associated with herbicidal application are commonly found in these areas.

Should there be a proposed redevelopment of the Property, Stantec would recommend collecting shallow soil samples along this Property boundary and submitting the samples to the laboratory for analysis of organochlorine pesticides, arsenic, and lead. The need for sampling for these compounds is for protection of construction workers during development of the paths when exposed to dust. The second issue is the potential for off-Site removal of soil, which will require profiling by chemical analysis to determine the proper location for disposal.

- An environmental records search was performed and identified sites within their respective ASTM E 1527-13 search radii of the Property that may represent RECs, HRECs, or de minimis conditions.

The Newmark Groundwater Contamination Superfund Site encompasses 23 square miles and is located within the Bunker Hill Groundwater Basin. The groundwater plume extends beneath the Property. The groundwater contamination impacts the drinking water resources in the region. Chemicals of concern (COCs) include tetrachloroethylene (PCE) and trichloroethylene (TCE). The groundwater plume is considered a REC to the Property. Stantec recommends soil vapor samples are collected to evaluate whether soil vapor beneath the Property has been impacted by the groundwater plume.

The Cajon landfill is an unpermitted landfill that is located within 200 feet of the Property. Given the close proximity and potential for methane in the subsurface, the landfill is considered a REC to the Property. Stantec recommends collecting soil vapor samples on the Property to evaluate the potential methane impact to the subsurface from the nearby landfill.

7.2 DATA GAPS

The federal AAI final rule [40 CFR 312.10(a)] and ASTM E1527-13 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the EP or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 1.4:	None
Weather-Related Restrictions to Site Reconnaissance:	None
Facility Access Restrictions to Site Reconnaissance:	None
Other Site Reconnaissance Restrictions:	None

Evaluation
 April 21, 2021

Gap	Discussion
Data Gaps from Environmental Records Review:	At the time of the preparation of this report Stantec paid for the records from the San Bernardino County Fire Department but was still awaiting receipt. Should any pertinent information become available Stantec will issue an addendum to this report. However, based on the historical reports and documents available, this is not a significant data gap.
Data Gaps from Historical Records Review:	None
Data Gaps from Interviews:	None
Other Data Gaps:	None

7.3 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of 5770 Industrial Parkway, in the City and County of San Bernardino, California, or the “Property.” Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed the following evidence of recognized environmental conditions (RECs) in connection with the Property:

- Adjacent Railroad Tracks.** Railroad tracks are located adjacent to the west-southwest of the Property. Herbicides are commonly applied to railroad alignments, and heavy metals associated with herbicidal application are commonly found in these areas. Should there be proposed redevelopment of the Property, Stantec would recommend collecting shallow soil samples along this Property boundary and submitting the samples to the laboratory for analysis of arsenic and lead. The need for sampling for these compounds is for protection of construction workers during development of the paths when exposed to dust. The second issue is the potential for off-Site removal of soil, which will require profiling by chemical analysis to determine the proper location for disposal.
- Former Property Features.** The Property received a “no further action letter” from the San Bernardino County Fire Department on February 12, 2020 for the former 5,000-gallon diesel UST, 5,000-gallon gasoline UST, and 1,000-gallon waste oil clarifier/sump. However, no soil vapor data has been collected to evaluate whether soil vapor beneath the Property has been impacted by the former USTs and clarifier/sump or the pressure washing station and drain. Therefore, these features are considered a REC to the Property.
- Groundwater Plume Associated with Newmark Superfund Site.** The Newmark Groundwater Contamination Superfund Site encompasses 23 square miles and is located within the Bunker Hill Groundwater Basin. The groundwater plume extends beneath the Property. The groundwater contamination impacts the drinking water resources in the region. Chemicals of concern (COCs) include tetrachloroethylene (PCE) and trichloroethylene (TCE). The groundwater plume is

SAN BERNARDINO, CALIFORNIA 92407

Evaluation
April 21, 2021

considered a REC to the Property. Stantec recommends collection of soil vapor samples to evaluate whether soil vapor beneath the Property has been impacted by the groundwater plume.

- **Cajon Landfill.** The Cajon landfill is an unpermitted landfill that is located within 200 feet of the Property. Given the close proximity and potential for methane in the subsurface, the landfill is considered a REC to the Property. Stantec recommends collecting soil vapor samples on the Property to evaluate the potential methane impact to the subsurface from the nearby landfill.

8.0 NON-SCOPE CONSIDERATIONS

The following ASTM E1527-13 Non-Scope Considerations were performed as part of this Phase I ESA:

8.1 LEAD-BASED PAINT

Concern for lead-based paint (LBP) is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

- The age of the dwelling as follows: maximum risk is from paint applied before 1950.
- There is severe risk from paint applied before 1960.
- There is moderate risk from deteriorated paint applied before 1970.
- There is slight risk from the paint that is intact but applied before 1977.
- The condition of the painted surfaces.
- The presence of children and certain types of households in the building.
- Previously reported cases of lead poisoning in the building or area.

Given the age of the building (circa 1985) the presence of LBP is considered unlikely.

8.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is ACM that can be reduced to powder by hand pressure. Friable asbestos can become airborne and inhaled, which has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

Stantec makes no warranty as to the possible existence or absence of inaccessible materials or to their evaluation with respect to asbestos content. Samples of suspect ACM should be collected for laboratory analysis of asbestos prior to any renovation or building demolition to be compliant with, EPA National Emission Standard for Hazardous Air Pollutants (NESHAP) regulations.

8.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through

SAN BERNARDINO, CALIFORNIA 92407

Non-Scope Considerations

April 21, 2021

foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA on average indoor radon concentrations in the vicinity of the Property (<http://www.epa.gov/radon/zonemap.html>).

EPA Radon Zones (w/Average Measured Indoor Radon concentrations)		
Zone 1 – High (>4.0 pCi/L)	Zone 2 – Moderate (2 to 4 pCi/L)	Zone 3 – Low (<2 pCi/L)
	X	

The Property is located in Zone 2 and is considered to have medium potential for radon. None of the seven tests conducted in Zipcode 92407 had concentrations above 4 pCi/L. To determine Property-specific radon levels, a radon survey would have to be conducted. However, because the Property is not residential and there are no occupied subgrade areas, further investigation of indoor radon issues is not warranted.

8.4 FLOOD ZONES

According to the Physical Setting summary portion of the EDR report, the Property is not located within a 500-year or 100-year flood plain.

SAN BERNARDINO, CALIFORNIA 92407

Appendix B Stantec Resumes
April 21, 2021

Appendix B STANTEC RESUMES

Debbie is a staff geologist hired in September of 2018 at the San Bernardino Office. Through her education at Cal Poly Pomona, Debbie has extensive research and writing experience while conducting thesis work. Field experience ranges from field mapping, rock and soil classification to vast experience utilizing geophysical equipment. Since starting at Stantec, Debbie has applied her knowledge towards Phase I and II Environmental Assessment field work and report preparation. Debbie has also overseen soil vapor extraction projects Debbie completed a GIS certification program through the California University Fullerton and is experienced in ArcGIS 10, Adobe Suite, and the Microsoft Office Suite.

Debbie's environmental consulting experience includes performing Phase I Environmental Site Assessments in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13, and the collection, and interpretation of Phase II Environmental Assessment data.

EDUCATION

Bachelor of Science, Geological Sciences,
California Polytechnica University, Pomona,
Pomona, CA, 2015

CERTIFICATIONS & TRAINING

Geographic Information Systems, California State
University, Fullerton, Fullerton, California, 2018

Lead Sampling Technician, National Association
of Training and Environmental Consulting,
Anaheim, California, 2019

8-Hour Supervisor Trainer Coarse Certification
Hazwoper, OSHA, Simi Valley, California, 2018

Adult and Pediatric First Aid/CPR/AED, American
Red Cross, San Bernardino, Ca, 2018

Asbestos Building Inspector Initial Course,
National Association of Training and
Environmental Consulting, Anaheim, California,
2018

PROJECT EXPERIENCE

Soil Vapor Intrusion Assessment/Mitigation Studies (including Methane)

Soil Vapor Intrusion Assessment, Various
Locations, California

Debbie performed field oversight during the
installation of multiple soil vapor monitoring wells.
She assisted with health and safety oversight,
classified the soils during drilling activities and
assisted with the well installation and subsequent
soil vapor sampling.

Groundwater Supply / Wells

Humboldt Energy, Water Supply Assessment

Debbie coauthored a water supply assessment
report for a wind energy project located in
Humboldt County, California. Through research of
groundwater basins and geographic information
system analysis, she finalized a report used to
supplement the design and construction of over 60
wind turbines and ancillary facilities.

Deborah J Hernandez

Geologic Staff

Phase I & II Environmental Site Assessments

Environmental Site Assessment, San Bernardino, Ca

Debbie performed an onsite reconnaissance survey, historical records investigation, and formulated the report deliverable. The report provided a thorough review of the property history and defined present environmental concerns for the client.

Aerial Mapping

Mars Data Analyst, JPL*, Pasadena, Ca (Geology Intern)

Duties included mapping geologic safety hazards using HiRISE, CTX and THEMIS images on ArcGIS; analyzed rock classification and distributions to downselect eight landing sites to four. Characterized over 300 craters and their respective ejecta blankets for potential landing sites. Presented findings at the 2014 Geological Society of America Conference, Abstract #249384

** denotes projects completed with other firms*

Alicia Jansen CAC, LRCIA

Environmental Scientist
18 years of experience

Alicia is an Associate Scientist with over fifteen years of experience in Phase I and II Environmental Assessments, with strong emphasis in water quality and environmental research. Alicia has managed the preparation of environmental documents, training programs, and environmental compliance during large scale environmental monitoring projects. Alicia's environmental consulting experience includes performing asbestos and lead-based paint surveys, oversight of contractors during asbestos abatement, hazardous materials surveys, and Phase I Environmental Site Assessments (ESAs) in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13 and the Standard Practice for Environmental Site Assessments for Forestland or Rural Property, ASTM Designation E 2247-16.

EDUCATION

BA, Environmental Studies, San Jose State University, San Jose, California, 2004

CERTIFICATIONS & TRAINING

Residential Measurement Provider, 108212, National Radon Proficiency Program, Anaheim, California, 2015

REGISTRATIONS

Certified Asbestos Consultant #CAC #15-5379, State of California Division of Occupational Safety and Health

Lead Inspector/Risk Assessor #LRC-00005363, California Department of Public Health

MEMBERSHIPS

Member, Groundwater Resources Association of California

PROJECT EXPERIENCE

HEALTH, SAFETY & INDUSTRIAL HYGIENE

Confidential Health Care Company, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Northern California | Staff

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple occupied hospitals and office spaces. The scope of work

involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings.

State of California General Services, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Northern California | 2009 | Technical Support

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple communication towers in remote areas. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Technical Support | Cost: Unknown | Dates involved: 10/2009-10/2009

Indoor Air Quality Assessments* | San Jose, California | 2002-2005 | Staff

Alicia performed site inspections, interviews, and collected air samples to be analyzed for various air pollutants and molds including formaldehyde, penicillium, aspergillus, cladosporium, and stachybotry. She prepared reports summarizing findings and made recommendations.

Veteran's Administration of Puget Sound, Asbestos and Lead-Based Paint Survey | Seattle, Washington | 2009 | Project Scientist

Alicia served as the Project Scientist responsible for hazardous building material assessments, specifically asbestos and lead-based paint. These services were required as part of the pre-design tasks for this project. Over 300 samples were collected over the span of four days culminating in a final hazardous building materials report to be incorporated into the facility design as well as demolition activities once the construction phase of the project commences.

Interim Remedial Action, Indoor Air Sampling, and Sub-Slab Soil Gas Sampling | Sunnyvale, California | 2004-2014 | Task Manager and Field Support

Alicia conducted an indoor air sampling survey using air sampling pumps, dosimeter badges, and flame ionization detector (FID) during a sump excavation. She performs semi-annual sub-slab soil vapor sampling and indoor air quality surveys using summa canisters. She assists with the preparation and submittal of reports summarizing the findings and provides recommendations to the local regulatory agency. Role: Indoor Air Sampling Survey | Cost: Unknown | Dates involved: 09/2004-09/2014

* denotes projects completed with other firms

Lead Dust Assessment and Abatement Oversight | Fremont, California | 2009 | Technical Support

Alicia assisted with the evaluation of lead dust in an industrial facility. A total of 307 dust wipe samples were collected in order to evaluate the potential presence of lead dust throughout the two-story, 500,000 square foot manufacturing building. Role: Technical Support | Cost: Unknown | Dates involved: 01/2009-03/2009

Former Tesoro Coke Facility, Asbestos, Lead-Based Paint Survey | Pittsburg, California | Technical Support

Alicia assisted with an asbestos and lead paint survey of 20 structures at the facility ultimately scheduled for demolition. More than 200 samples were collected over the span of two days. She prepared a report for demolition while also providing the information needed for worker safety during demolition activities at the facility. Role: Technical Support | Cost: Unknown | Dates involved: 04/2009-04/2009

State of California General Services, Asbestos and Lead-Based Paint Survey | Southern California | 2014-2019 | Certified Asbestos Consultant

Alicia conducted with site inspections for asbestos and lead-based paint at multiple bridges, maintenance stations, and roadways throughout Southern California. The scope of work involved sample collection for asbestos and lead-based paint that would require special handling and disposal. She assisted with the review and approval of reports summarizing findings. Role: Certified Asbestos Consultant | Cost: Unknown | Dates involved: 9/2014-10/2019

PERMITTING, COMPLIANCE, AUDITING

Tesoro Refinery, Initial Study* | Benicia, California | 2005 | Staff

Alicia assisted with the background research and preparation of applicant-prepared initial study for the upgrade of a refinery.

Transmission Line Upgrade* | San Mateo to San Francisco, California | 2005 | Environmental Research and Compliance Staff

Alicia supported the environmental compliance program for the construction of a 27-mile 230 kV underground and overhead transmission line. She assisted with the preparation and submittal of variance requests, extra work space requests, and daily and weekly reports for submittal to the California Public Utilities Commission. She also conducted research and assisted with training and report preparation.

REMEDIAL INVESTIGATIONS & ASSESSMENTS

California Department of Transportation Portfolio | Multiple Sites, Northern California and Southern California, California | 2008-2019 | Task Lead Manager

Alicia prepared quarterly groundwater monitoring reports, subsurface investigation reports, sensitive receptor surveys, and preferential pathway studies for various California Department of Transportation locations throughout Northern California. She assisted with the utility locating, work plan preparation, field coordination, archived data onto the State Water Resource Control

Board's (RWQCB) Geotracker electronic filing system. Alicia currently conducts site inspections for asbestos, lead-based paint, and hazardous materials for bridges, salt barns, and maintenance buildings associated with California Department of Transportation locations throughout Southern California. The scope of work involves sample collection for asbestos and lead-based paint that would require special handling and disposal. She assists with the preparation of reports summarizing findings. Role: Task Lead Manager | Cost: Unknown | Dates involved: 06/2008-02/2019

Soil Gas Sampling and Human Health Risk Assessment | San Jose, California | 2014 | Project Lead

Alicia performed a soil vapor survey in conformance with the DTSC Advisory Active Soil Gas Investigations, using soil vapor sampling devices and a mobile laboratory for onsite chemical analysis. She also assisted with the report preparation summarizing the findings and providing recommendations for further assessment.

Confidential Client, Phase I Environmental Site Assessments | Multiple Sites, California, Arizona, New Mexico, Texas, Virginia | Task Manager

Alicia performs Phase I Environmental Site Assessments for multiple confidential clients in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13 and Standard Practice for Environmental Site Assessments for Forestland or Rural Property, ASTM Designation E 2247-16 to achieve compliance with requirements of the "All Appropriate Inquiries" rule required to obtain protection from liability under the federal Comprehensive Environmental Response, Cleanup and Liability Act (CERCLA). Previous sites include large industrial warehouses, multi-tenant commercial buildings, large lots of vacant land, and residential properties. She reviews topographic maps, Sanborn Fire Insurance Maps, and files at local regulatory agencies. She interviews present and former property owners and performed site and adjacent property reconnaissance. She prepares reports summarizing the findings and provides recommendations for further assessment if applicable. Cost: 3-8000 per report

Goodyear Portfolio | Northern California and Hawaii | 2005-present | Project Lead

Alicia performed Phase I Environmental Site Assessments (ESA) and Phase II Site Assessments for various Goodyear Tire & Rubber Company locations throughout California and Hawaii. She assisted with the installation of monitoring wells and exploratory borings; underground storage tank removals; site restoration; product removal with passive recovery system; archived data onto the State Water Resource Control Board's Geotracker electronic filing system; and assisted with the preparation of quarterly groundwater monitoring reports, sensitive receptor surveys, site conceptual models, and subsurface investigation reports. Approximately 250 Sites • Cost: \$8,000 per site.

Kyle has more than 28 years of professional experience—17 of those years with Stantec—providing geotechnical and environmental consulting. During the course of his experience, he has been involved with a wide variety of geological and engineering projects. He has been in direct charge of quality control/quality assurance (QA/QC) work for Stantec and previous firms for geological, engineering geological, and environmental services primarily in California. Additionally, Kyle has been a primary contact for Stantec with many different clients (including multi-party actions) and regulatory bodies involving contracting, workplan approvals, site assessments and closures, permitting, remedial action, and litigation support. With regard to litigation services, Kyle has extensive experience providing expert witness testimony, second-party review, and litigation support and analysis.

Kyle's extensive experience includes assessment and remediation of property-specific and regional issues involving soil and groundwater contaminated with petroleum hydrocarbons, chlorinated solvents, heavy metals, pesticides, and PCBs.

He currently serves as the managing principal geologist in Stantec's Redlands, California office.

EDUCATION

Engineering Geology/Hydrogeology, California State University, Los Angeles, California, 1984

AS, General Science, Crafton Hills College, Yucaipa, California, 1975

BS, Geological Sciences, California State University, Long Beach, California, 1982

REGISTRATIONS

Certified Engineering Geologist #1271, State of California Issued 1985, Expires 2011

Professional Geologist #4066, State of California Issued 1985, Expires 2011

PROJECT EXPERIENCE

Bioremediation

Excavation and Treatment of Petroleum-Contaminated Soil

Kyle designed the excavation and treatment of 45,000 cubic yards of petroleum-contaminated soil. Soil treatment included utilizing vapor extraction, combined with bioremediation.

Chemicals & Polymers

Two Former Chemical Plants, Environmental Site Assessments and Remediation, Vernon, California

Mr. Emerson was part of the team for conducting Phase I and Phase II Environmental Site Assessments (ESA) and developing remedial action plans for two former chemical plant sites with 80-year industrial histories. Phase I ESAs used historical files, maps, aerial photographs, available documents, and data from public agencies and historical directories for identifying recognized environmental concerns. Extensive Phase II ESA survey activities aided in identifying below-grade structures such as vaults/USTs, as well as assessing the extent of influence and nature of the contamination. These investigations confirmed the presence of heavy metals, petroleum hydrocarbons, volatile organic compounds, polychlorinated biphenyls, radioactive materials, semi-volatile organic compounds, and polycyclic aromatic compounds in the soils for these sites. Specific areas of concern included former settling ponds, a bone yard, maintenance areas, transformer and substations, wastewater treatment facilities, and above-ground storage tank farms. A conceptual mode was developed for use in a health risk assessment and developed risk-based corrective actions to address potential health and environmental concerns. He assisted with the development and implementation of a remedial action plan, combined administrative controls, engineering controls, and active remediation; this resulted in the cost-effective return of one site to active use, and is reducing health risks to occupants and the public at the second site.

CONFIDENTIAL: Aerospace Adhesives and Coatings Plant, Glendale, California

Mr. Emerson was part of the team that conducted feasibility studies to evaluate remedial alternatives for remediation of chlorinated VOCs, 1,4 dioxane, and hexavalent chromium (CrVI) in soil, soil vapor, and groundwater. Feasibility studies included groundwater pump testing, benchscale column testing to evaluate in situ alternatives for reducing CrVI to the less mobile CrIII valence state, soil vapor extraction, capping, and excavation. Field pilot studies were performed to evaluate the efficiency of various CrVI reductants including the use of ferrous sulfate, calcium polysulfide, emulsified oil, and fructose. Extensive multi-depth soil vapor testing was conducted to evaluate the distribution of VOCs in the subsurface and to support vapor intrusion risk assessment. Feasibility studies were completed in 2008. Remedial actions are expected to be completed in 2011.

Condition Assessments

Assessment and Mitigation of Manufacturing Facility

Kyle managed the assessment and mitigation of an ammunition manufacturing facility covering 1,100 acres in a complex geologic environment. The contaminants involved red and white phosphorous, TNT, chlorinated solvents, solid wastes, and live ordinance.

Soil Contamination Assessment Supervision and Management

Kyle managed and supervised soil contamination assessment and in-situ remediation of heavy metals involving chromium, cadmium, nickel and zinc by chemical fixation to depths in excess of 40 feet below ground surface beneath existing structures within several manufacturing facilities.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Litigation Support and Expert Testimony

Kyle provided litigation support and expert testimony on more than 20 separate projects involving service stations, chlorinated solvent cases, heavy metal, and semi-volatile releases.

Corporate / Office

Commercial Developer - Environmental Remediation of Former Dry Cleaners, El Centro, California

Mr. Emerson was responsible for assessments and remediation at this former dry cleaners which released the dry cleaning chemical tetrachloroethene (PCE) to the ground and underlying groundwater. The work included initial site assessment, agency interaction and negotiations with the California Regional Water Quality Control Board (CRWQCB), and Colorado Basin Region human health risk assessment (HHRA), design and implementation of remedial investigations, feasibility studies, remedial action plans, and implementation of remediation in mitigating chlorinated solvent contamination in vadose and saturated zones at concentrations indicative of DNAPL. The results of the completed remediation, as well as continued confirmation sampling and monitoring, allowed the CRWQCB to issue site closure in 2008. The site has since been redeveloped into a new commercial development.

Environmental Assessments

Siting Studies

Kyle performed initial siting studies for potential Class I, II, and III landfills. The project included detailed geologic mapping, hydrogeological studies, and permeability studies of caps and liners.

Environmental Site Remediation

Assessment and Remedial Design, California (Project Supervisor)

Kyle supervised the assessment and remedial design of a system to eliminate salt brine contamination in shallow perched water horizons in the Yucaipa, San Bernardino, and Riverside areas of southern California.

Design and Installation of Recovery Systems*

Kyle designed and installed numerous free-product recovery systems that successfully recovered product. One of the sites contained product up to 11-feet thick covering more than three city blocks. The dissolved phase had affected a multi-aquifer system and a public drinking water system.

Geophysical Characterizations*

Kyle performed and supervised numerous geophysical characterizations to determine the extent of old landfills. He provided classification studies, landfill gas monitoring, removal verification during grading, methane collection and mitigation plans, permitting, and closure plans.

Domestic Landfill Development*

Kyle designed and supervised the dynamic consolidation of a domestic landfill for development. He used this process to minimize expected settlement to overlying structures. Kyle designed commercial developments on closed landfills that involved complex methane collection and monitoring systems and building settlement controls.

* denotes projects completed with other firms

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Clay Borrow Site Studies

Kyle performed more than 10 separate clay borrow site studies for determining sources of material to cap landfills; ranged from a 20-acre dry lakebed to a 450-acre parcel in complex folded marine sediments.

Assessment, Clean Up, and Regulatory Support Management, Santa, Monica (Project Manager)

Kyle managed the assessment, clean up, and complex regulatory support of a PRP site in an MTBE case (Charnock subbasin). His work involved more than 20 environmental professionals working full time for two years to complete the assessment and clean up mandated by the regulatory agencies.

Hazardous Waste

San Gabriel Valley Superfund Site, Remediation & Closure of Multiple Source Areas, Industry, California

Mr. Emerson performed feasibility studies to evaluate appropriate and relevant remedial alternatives to mitigate constituents of concern in five AOCs contaminated with chlorinated hydrocarbons, heavy metals, petroleum fuel, and cutting oils. Ultimately, a combination of remedial alternatives was implemented that included large-diameter auger excavation to 45 feet to minimize impacts on facility operations, vapor extraction, vapor intrusion risk assessment, deed restriction, and monitored natural attenuation. At the completion of remedial actions, confirmation soil, soil vapor, and groundwater sampling were conducted and followed with risk assessment to demonstrate that remedial objectives had been achieved. No further action was recently granted by the US EPA and Los Angeles Regional Water Quality Control Board.

Mixed-Use

Port of San Diego Rohr Facility, Chula Vista, California

Mr. Emerson assisted in a detailed subsurface assessment of the Rohr facility. The intent of the assessment was to evaluate the 40-acre former aircraft part manufacturing facility for acquisition by the Port of San Diego for redevelopment into a business park and entertainment complex. The assessment identified the presence of soil, soil vapor, and groundwater impacts by petroleum hydrocarbons, VOCs, heavy metals, PCBs, and semi-volatile organic compounds. He utilized many sampling techniques to assess the limits and concentrations of contaminants in the subsurface. Ultimately, the team was able to develop a cost estimate for potential remedial action cost associated to corrective action to allow redevelopment.

Master Planned Commercial/Residential Redevelopment Project, Whittier, California (Project Manager)

Kyle oversaw the assessment of 26 contiguous properties that are part of a 21-acre master planned commercial/residential redevelopment project. The properties included industrial facilities, platting lines, fuel USTs, and metal processing plants, among others. The estimated cleanup costs are approximately \$2 million.

* denotes projects completed with other firms

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Multi-Unit / Family Residential

Residential Development Assessment, Ventura, California (Project Director)

Kyle directed an assessment of a 40-acre former agricultural property proposed for residential development. Pesticides were identified above hazardous waste levels and preliminary remediation goals established by the U.S. Environmental Protection Agency. Through corrective grading methods and onsite placement of the pesticide impacted soils, all material were re-used on site without offsite disposal. The overall cost savings for the client was more than \$1 million. Total cost was less than \$250,000 for all necessary activities.

Oil & Gas

Oil Field Site Assessments*

Kyle performed site assessments at oil field leases involving refineries, bulk storage areas, piping systems and wellhead, and drilling mud pit contamination.

Environmental Protection Agency Superfund Action, Culver City, California (Project Manager)

Kyle served as the project manager representing a major oil company in the assessment, remedial action, and litigation support in a multi-party contamination case affecting a City water supply. The assessment involved more than 250 continuous core borings up to 100 feet, as well as extensive remedial actions. The total cost for all related activities was \$22 million. The case is settled and the closure of the site is pending.

Project Management

Liability and Property Management Consulting Services

Kyle is providing liability and property management consulting services to more than 10 medium to large property development firms in the US. His work involves property transaction assessments, contract review, acquisition guideline development, liability management evaluation, insurance acquisition, and strategic planning.

Residential Development

Environmental Development Management and Review (Project Manager)

Kyle manages and reviews environmental development issues for a large residential developer specializing in development of contaminated industrial properties by providing innovative solutions in developing contaminated properties for residential use through risk assessment, engineering, and administrative and property development controls.

Site Management and Remediation

Design and Implementation of Biodegradation Programs*, California

Kyle designed and implemented one of the first in-situ biodegradation programs in California; it involved 50,000 cubic yards of diesel-contaminated soils, and groundwater to depths of 70 feet below ground surface.

* denotes projects completed with other firms

Soil and Groundwater Remediation Systems

Soil and Groundwater Contamination Assessments and Mitigation*, California (Project Manager)

Kyle managed numerous chlorinated solvent soil and groundwater contamination assessments and mitigation programs in southern California. The projects involved releases that impacted soil and groundwater to depth of groundwater more than 700 feet in multi-aquifer systems. One case involved with plume dimensions more than 1 mile from the source affecting residential properties.

Soil and Groundwater Assessment and Remediation Programs*

Implemented hundreds of soil and groundwater assessment and remediation programs at various service station facilities in Southern and Northern California, and Nevada. Work involved assessment, remedial design, installation, maintenance and monitoring. Closure has been received on a majority of these sites.

Assessment and Remediation Management*

Kyle managed the assessment and remediation of soil and groundwater manufacturing at dry cleaning facilities contaminated with chlorinated solvents.

Warehouse / Light Industrial

Glendale Redevelopment Project, Glendale, California (Project Manager)

Kyle managed the assessment and remedial actions during the redevelopment of an industrial property. The project involved the demolition of a historic manufacturing facility and a commercial dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. Remedial actions involved excavation by pattern drilling and off site disposal along with removal of former USTs. The total cost of remediation and assessment was \$450,000.00.

Compton Redevelopment Project, Compton, California (Project Manager)

Kyle is serving as project manager for the assessment and remedial actions for a large redevelopment project. The project involves the redevelopment of a historic manufacturing facility and a former dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. The industrial facility was also associated with significant volumes of buried waste that required removal and disposal. These wastes also included the chemical referenced above, as well as PCBs and heavy metals. Remediation has included excavation, vapor extraction, and chemical fixation. The total cost of this project has been \$2.8 million to date.

** denotes projects completed with other firms*

Appendix C USER PROVIDED RECORDS

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner*, *bona fide prospective purchaser*, or *contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization For services form.

1. Property Information

Property Name: 5770 Industrial Pkwy _____
Property Address(es): 5770 Industrial Pkwy _____
City: San Bernardino _____ State CA __ Zip 92407 _____
Property Owner Name: Michelle Um _____
Property Owner Phone #: _____

2. Contact For Site Access

Name: Benjamin Horning _____
Company/Organization/Title: Dedeaux Properties _____
Phone # ____ E-Mail Address: benh@dedeauxproperties.com _____

3. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
_____ Yes _____ X _____ No

If yes, describe or attach details of the lien _____

4. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?
_____ Yes _____ X _____ No

If yes, describe or attach details of the limitations _____

5. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

_____ Yes No

If yes, describe or attach details of your specialized knowledge or experience _____

6. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for the property reasonably reflect the fair market value?

Yes _____ No

_____ Not applicable. User is not involved in a purchase of the property.

If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

_____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

_____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

7. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

_____ Yes (describe) _____

No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

_____ Yes (describe) _____

No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

Yes (describe) _____

No

Do you know of any environmental cleanups that have taken place at the property?

Yes (describe) _____

No

8. The Degree of Obviousness of Contamination. E1527-13 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indicators that point to the presence or likely presence of contamination at the property?

Yes (describe) _____

No

9. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

Yes (describe) Prior buyer had a Phase 1, so did seller. _____

No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 NPL

EXECUTIVE SUMMARY

site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/30/2020 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
NEWMARK GROUND WATER EPA ID:: CAD981434517 EPA ID:: CAD981434517	BUNKER HILL GROUND W	0 - 1/8 (0.000 mi.)	0	60

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/26/2020 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at proposal June 24, 1988): The four municipal supply wells of Newmark Well Field are in an area of approximately 700 square feet bounded by 48th Street, Magnolia Drive, Reservoir Drive, and the San Bernardino County Flood Control Channel in the Muscoy area north of San Bernardino, San Bernardino County, California. The San Bernardino Municipal Water Department was forced to close the four wells in the early 1980s when they were found to be contaminated with high levels of halogenated organic chemicals, including tetrachloroethylene, also known as perchloroethylene (PCE), and trichloroethylene (TCE). An August 1986 report by a consultant to the California Regional Water Quality Control Board identified possible contaminant sources. A midnight dumping operation from the late 1950s to early 1960s appears to be the most likely source of contamination. It is approximately 300 feet upgradient of the Newmark wells. The California Department of Health Services is installing air stripping towers to remove contaminants from ground water. The towers are scheduled to be in operation in mid-1988. An additional 10 municipal wells in San Bernardino have also been retired from service due to PCE/TCE contamination. An apparent hydrogeologic barrier, the Pelona Schist outcrop of the Shandin Hills, suggests that contamination of these 10 wells is originating from different sources. The 14 municipal wells that have already been retired from service served 25 percent of the city's total population, and additional wells are also threatened. The San Bernardino wells supply 80,000 people in the cities of San Bernardino and Loma Linda, and the loss of any additional wells could leave some areas without water. The municipal supply wells for Riverside also lie directly downgradient. No alternative water sources are currently available. Status March 31, 1989): The air stripping towers are now in operation.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 805
Site Name: 7 ELEVEN INC #26934
Violation Date: 03-04-2014
Citation: HSC 6.7 25290.1(d) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(d)
Violation Description: Failure of a UST system installed on or after July 1, 2004 to be designed and constructed so as to detect the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment.
Violation Notes: Returned to compliance on 03/04/2014. 89 PIPING SUMP AND ALL OF THE FILL SUMP SPILL BUCKETS (3) HAD LIQUID AT THE BOTTOM SURFACES; THE TECNICIAN REMOVED THE LIQUID DURING THE INSPECTION.
Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS
Site ID: 805
Site Name: 7 ELEVEN INC #26934
Violation Date: 02-14-2018
Citation: HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 02/16/2018. FACILITY CORRECTED INFORMATION IN CERS ON 02/16/18, CLOSE OUT VIOLATION, SHANE BARBAO-PREYES OBSERVATION: FACILITY'S UST'S WERE INSTALLED ON 06/04/1987. AS PER REVIEW OF UST INFORMATION IN CERS, THE CORRECT DATE WAS NOT SUBMITTED. COMPLIANCE REQUIREMENT: UPDATE CERS WITH CURRENT INFORMATION.

Site Name: 7 ELEVEN INC #26934
Violation Date: 03-04-2014
Citation: HSC 6.7 29291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 29291(b)
Violation Description: Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment.
Violation Notes: Returned to compliance on 03/04/2014. 89 FILL SUMP SENSOR FAILED DURING TESTING; THE TECHNICIAN REPLACED THE SENSOR AND CONDUCTED A RETEST THAT PASSED.

Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 805
Site Name: 7 ELEVEN INC #26934
Violation Date: 02-22-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 03/22/2019. OBSERVATION: AS PER REVIEW OF THE (12/14/2018) OVERFILL PREVENTION CERTIFICATION FORM, NOTED THAT T2 87 DROP-TUBE SHUT OFF (FLAPPER) FAILED. COMPLIANCE REQUIREMENT: 1) REPLACE THE T2 DROP TUBE. 2) PROPERLY INSTALL REPLACEMENT DROP TUBE. 3) SUBMIT AS- BUILDS PLANS 4) CALL FOR A WITNESSED FUNCTIONALITY TEST.

full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 03/29/2018. FACILITY PROVIDED SUPPORTING DOCUMENTS, CLOSE OUT VIOLATIONS, PER SHANE BARBAO-PREYES OBSERVATION: DURING THE INSPECTION, THE EXTERNAL OVERFILL ALARM FAILED WHEN TESTED. COMPLIANCE REQUIREMENT: SUBMIT A SCOPE OF WORK ADDRESSING THE OVERFILL ALARM. CALL OFFICE FOR A WITNESSED RE INSPECTION.

Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 805
Site Name: 7 ELEVEN INC #26934
Violation Date: 02-14-2017
Citation: 23 CCR 16 2712 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712

Violation Description: Failure to comply with any of the applicable requirements of the permit issued for the operation of the UST system.

Violation Notes: Returned to compliance on 02/14/2017. OBSERVATION: THE VEEDER ROOT 420 ANNULAR SENSORS FOR TANKS 2 (87) AND 3 (91) FAILED TO INITIATE POSITIVE TURBINE SHUTDOWN WHEN TESTED. REQUIREMENT: THE TECHNICIAN REPLACED THE FAILED SENSORS WITH LIKE-FOR-LIKE EQUIPMENT WHILE ON-SITE. THE NEW SENSORS WERE VERIFIED TO RESULT IN PANEL ALARMS AND TURBINE SHUTDOWN UPON RETEST. VIOLATION CORRECTED; NO FURTHER ACTION REQUIRED.

Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 805
Site Name: 7 ELEVEN INC #26934
Violation Date: 02-14-2017
Citation: HSC 6.7 25290.1(c)(3), 25290.2(c)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c)(3), 25290.2(c)(3)

Violation Description: Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003 and before July 1, 2004, or on or after July 1, 2004.

Violation Notes: Returned to compliance on 02/14/2017. OBSERVATION: APPROXIMATELY 4 GALLONS OF LIQUID WAS REMOVED FROM THE 91 FILL SUMP AT THE TIME OF INSPECTION. IT APPEARED THAT THE MAJORITY OF THE INTRUSION ACCUMULATED ON THE SIDE OF THE SUMP OPPOSITE THE SENSOR (NO LIQUID ALARMS RECORDED FOR THIS LOCATION). REQUIREMENT: THE TECHNICIAN REMOVED AND PROPERLY CONTAINERIZED THE LIQUID WITHIN THE DESIGNATED ONSITE HAZARDOUS WASTE CONTAINMENT. VIOLATION CORRECTED. NOTE: THE LACK OF VIEW PORTS ON THE MANWAY LIDS MAKES IT IMPOSSIBLE TO SEE INTO THE SUMP WITHOUT REMOVING THE ENTIRE LID. THE 91 FILL SUMP NEEDS TO BE PERIODICALLY MONITORED (VISUALLY) TO DETERMINE LEVEL OF LIQUID ACCUMULATION AND/OR REPOSITION THE SENSOR TO DETECT LIQUID AT THE EARLIEST OPPORTUNITY

FUDS Detail as of Jan 2015:

Fiscal Year: 2013
 Federal Facility ID: CA9799F5587
 RAB: Not reported
 NPL Status: Listed

Description: The site included 1,662.82 acres. Present owners include industrial, commercial and residential developers, and private landowners. Industrial buildings, shopping centers, multi-family apartment buildings, and single-family residences occupy the site. The former San Bernardino Engineering Depot consisted of 1662.82 acres and is located 4 miles northwest of San Bernardino bounded by Kendall Drive, Cajon Boulevard, and Little League Avenue with the Interstate Freeway running through the center of the property parallel with Cajon Boulevard. A second separate parcel of land is bound by 3rd Avenue on the north, First Avenue on the south, Gary Street on the west, and Nolan Street on the east. A third separate parcel of land is located between the Southern Pacific Railway on the east, Cajon Boulevard on the west, Institution Road on the north, and running approximately 1 mile to the southern boundary. A fourth parcel of land occupies an area 0.25 mile north of Little League Drive and up to Yucca Avenue between the Union Pacific Railroad and Cajon Boulevard. A fifth parcel lies 0.25 mile north of the fourth parcel and is bounded by Cajon Boulevard on the east, the Union Pacific Railroad on the south where the railroad and road cross each other. Camp Ono occupied approximately 300 acres within the Depot.

History: The U.S. Army leased the site in 1940 from four owners. It was used as a military storage and repair depot, dry cleaning facility, tent manufacturing facility, locomotive vehicle maintenance, storage, and filler mission for the Los Angeles Port of Embarkation. The Army terminated the leases on the site in various parcels from 1945 to 1948. The properties were returned to the original owners on the dates indicated. The present owners include industrial commercial and residential developers and private land owners. There are industrial buildings shopping centers, multi-family apartment buildings, and single family residences currently occupying the site.

USEPA, Army and Department of Justice representatives to negotiate reimbursement of past costs on June 15, 2000.

Completed Area Name: Newmark
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 09/25/2004
Comments: Start-up and operation of a 17 million gallon per day groundwater treatment remediation system for the Newmark Operable Unit.

Completed Area Name: Newmark
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 09/30/2002
Comments: The remedial design for the Muscoy Operable Unit was completed.

Completed Area Name: Muscoy
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision - Amendment
Completed Date: 03/21/1995
Comments: DTSC reviewed the draft ROD for the Newmark Groundwater Muscoy Plume OU and concurs with US EPA's selected remedy of extraction and treatment of contaminated using granular activated carbon carbon treatment technology and distribution of the treated water to a public water supply agency (and/or reinjection into the aquifer).

Background Info: This site is part of the North San Bernardino Area groundwater site. It encompasses four municipal wells known as the Newmark Well Field. The site was listed on the NPL in March, 1989. The site consists of approximately 700 square feet in the Bunker Hill Groundwater Basin. The San Bernardino Municipal Water Department was forced to close the four wells in the early 1980s, when they were found to be contaminated with high levels of halogenated organic chemicals including tetrachloroethylene (PCE) and trichloroethylene (TCE). There are levels of TCE and PCE in the four domestic water wells above the State health based action levels for drinking water at this site. TCE was a degreaser used in large quantities for commercial, industrial, and aerospace applications in the area. PCE is a similar degreaser and is commonly used as a cleaning compound in the dry cleaning industry. Groundwater in the well field is of high natural quality. Four domestic supply wells have been closed. There is evidence that suggests that the contamination is moving in the direction of other well fields serving the majority of the population of the cities of San Bernardino and Riverside. The population served by wells potentially affected by the contamination is at least 200,000. In November, 1986, DHS found the Bunker Hill Basin, including the Newmark Well Field, to constitute an imminent and substantial endangerment to public health and the environment. However, there is no known current exposure above the drinking water standards. In October, 1986, DHS entered into a contract with the City of San Bernardino to conduct initial remedial actions. These actions included design, construction and installation of airstripping towers (using carbon vapor units to control exhaust emissions) for the Newmark well field. These actions were part of work conducted for the State's North San Bernardino Superfund Site. The treatment system has been in operation since June, 1988, and it replaced the total capacity of the four municipal wells. The system can treat up to 8.6 million gallons per day. DTSC and U.S. EPA entered into a Superfund agreement to clean up the Newmark Operable Unit. The Newmark OU groundwater treatment system is operational. This treatment system integrates into and replaces the State funded treatment system installed in 1988. Groundwater extraction wells have been installed at the leading edge of the Newmark contamination plume. Air stripping towers at the Waterman and at the 48th Street treatment plants have been replaced with Granular Activated Carbon (GAC) treatment units. Total groundwater treatment capacity for the Newmark OU is 41.6 million gallons per day. Not reported Additional carbon units will be added to the Newmark OU Treatment system to handle additional contaminated water from

CA BOND EXP. PLAN:

Reponsible Party: DETAILED SITE EXPENDITURE PLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc:

Currently there are no identifiable responsible parties. Therefore, Bond funds will be used to investigate and remediate the site. If during the investigation RPs are identified, DHS will pursue appropriate cost recovery actions. In May, 1987, DHS reevaluated the MITRE model hazard ranking score for the site and based on the revised score submitted the package to EPA for possible inclusion of the site on the NPL. EPA has listed one of the well fields (Newmark) in the North San Bernardino Area as a potential NPL site. For more information on the Newmark site, refer to the NPL listings in this Plan.

Site Description:

This site is an area of ground water contamination and consists of approximately 15 square miles in the Bunker Hill Ground Water Basin in San Bernardino County. The site includes areas within the following zip codes: 92401, 92404, 92405, 92407, and 92411. In the past four years, the San Bernardino Municipal Water District has removed fourteen domestic supply wells from production because of trichloroethylene (TCE) and tetrachloroethene (PCE) contamination.

Hazardous Waste Desc:

There are levels of TCE and PCE in domestic water wells above the State health-based action level for drinking water at this site. TCE was a degreaser used in large quantities for commercial, industrial and aerospace applications in the area. PCE isa similar degreaser and dry cleaning compound that was also commonly used by local businesses.

Threat To Public Health & Env:

Ground water in the Bunker Hill Basin is of high natural quality. Fourteen domestic supply wells have been closed. There is evidence that suggests that the contamination is moving in the direction of well fields serving the majority of the population of the Cities of San Bernardino and Riverside. The population served by wells potentially affected by the contamination is at least 200,000. In November, 1986, DHS found the area to constitute an imminent and substantial endangerment to public health and the environment. There is no known current exposure above the drinking water standards.

Site Activity Status:

An interagency group consisting of the City of San Bernardino Municipal Water District, the RWQCB (the Santa Ana region), the San Bernardino County Department of Health Services, and DHS (Public Water Supply Branch and TSCD) are coordinating an effort for characterizing and mitigating the contamination. Field site characterization activities were initiated in November, 1987. In October, 1986, DHS entered into a contract with the City of San Bernardino for initial remedial measures. These measures included the design, construction and

installation of airstripping towers (with carbon vapor units to control exhaust emissions) in two locations and a carbon filtration water treatment system in one location. The treatment system will replace the full capacity of the City's water supply. The first airstripping tower system has been in operation since June, 1988. Construction of the second set of towers was started shortly thereafter.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

West Map: 5630611 DEVORE, CA
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C7940H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C7910H	FEMA FIRM Flood data

06071C7920H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile WSW
Site Name:	Cajon Landfill
Site EPA ID Number:	CAD983603267
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	approximately 250 feet.
Hydraulic Connection:	Site-specific hydraulic connection information is not available, but sandy gravels are present to a depth of 250 feet and the nearby Loma Linda Fault acts as a leaky barrier to lateral ground water flow.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	35 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	35 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: FRIANT

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 141 Min: 0.07	Max: Min:
2	14 inches	18 inches	unweathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 141 Min: 0.07	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

CITY OF SAN BERNARDINO PLANNING AND BUILDING SERVICES DEPARTMENT

BUILDING DEVELOPMENT PERMIT APPLICATION

BUILDING DEVELOPMENT PERMIT CERTIFICATIONS

WORKMAN'S COMPENSATION DECLARATION / EXEMPTION:

This section need not be completed if the work to be performed under this permit is valued at one hundred (\$100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to Workers' Compensation Laws of California.

APPLICANT SIGNATURE _____ Date _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

WORKERS' COMPENSATION DECLARATION:

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.)

Certified copy is hereby furnished. Certified copy is already filed with the Planning and Building Services Department of the City of San Bernardino

Workman's Compensation Carrier: _____ Policy No. _____ Exp. Date _____

LICENSED CONTRACTORS DECLARATION:

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

CONTRACTOR'S SIGNATURE _____ Date _____

CONSTRUCTION LENDING AGENCY:

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued. (Sec. 3097, Civil Code).

Lender's Name _____ Lender's Address _____

No Construction Lender

SIGNATURE _____ Date _____

OWNER-BUILDER DECLARATION:

I hereby affirm that I am EXEMPT FROM THE CONTRACTOR'S LICENSE LAW for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.00):

SIGNATURE: _____ Date _____

I, as owner of the property, or my employees with wages as their sole compensation; **WILL DO THE WORK**, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code; The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).

SIGNATURE: R.F. Walter Date 10-14-91

I, as owner of the property, am **EXCLUSIVELY CONTRACTING** with licensed contractors to construct the project (Sec. 7044, Business and Professions Code; The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).

Contractor's list must be attached. Yes No

SIGNATURE _____ Date _____

I am exempt under Sec. _____ Business and Professions Code for this reason:

Owner ID verified by driver's license. Yes No Driver's License No. 40452924 Expires: 1991

Verification of Ownership by (type of document, i.e. - property tax bill or deed): OK

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION:

I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than thirty-six (36) feet high. (Chap. 3.2, Grp 2, Art 2, Sec. 341, Title 8, California Administrative Code).

As owner-builder, I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the Division.

SIGNATURE _____ Date _____

Division of Industrial Safety Permit No. _____

HAZARDOUS MATERIALS AND EMISSIONS CERTIFICATION

1. Will the applicant or present or future building occupant need to file and certify a Business Plan for emergency response to a release or threatened release of a hazardous material?

Yes No

(Section 25505 of the California Health and Safety Code requires, with some exceptions, that a Business Plan be filed with the County of San Bernardino by every business which has at any one time during a reported year a quantity of hazardous materials equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure).

2. Does or will the applicant or present or future building occupant need to file a registration form for acutely hazardous materials?

Yes No

(Section 25533 of the California Health and Safety Code, with some exceptions, requires registration with the County of San Bernardino by each business which at any one time has on hand a quantity of acutely hazardous materials equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure).

3. Does or will the applicant or present or future building occupant need to prepare an RMPP (Risk Management and Prevention Program for acutely hazardous materials)?

Yes No

(Section 25534 of the California Health and Safety Code provides that the County of San Bernardino may require the preparation, certification and filing with the County of an RMPP by businesses which are required to register acutely hazardous materials with the County).

4. If an RMPP is presently required, has Section 25534 of the California Health and Safety Code been fully complied with?

Yes No

5. Does or will the applicant or present or future building occupant require for the work which is the subject of this application a permit for such construction or modification from the South Coast Air Quality Management District or from any other air pollution control district or agency?

Yes No

(Section 65850.2 of the California Government Code requires that the requested information be furnished on applications for non-residential building permits).

6. Will any part of the facility to be constructed under this permit be within 1000 feet from the outer boundaries of a school?

Yes No

(If "yes", the facility must meet the requirement of Sections 25534 and 42303 of the California Health and Safety Code).

7. If a permit from the South Coast Air Quality Management District or other air pollution control district or agency is required for the work which is the subject of this application, have all of the disclosures prescribed by California Health and Safety Code Section 42303 been made?

Yes No

(If "yes", attach certificate of compliance from the appropriate air pollution control officer). Certificate of compliance: I certify that under penalty of perjury the information given above is correct. I agree to comply with all state laws and city ordinances regarding Hazardous Materials and Emissions.

SIGNATURE _____ Date _____

CERTIFICATE OF COMPLIANCE AND AUTHORIZATION OF ENTRY: I certify that I have read this application and state that the information given is correct. I agree to comply with all state laws and city ordinances relating to building construction, and authorize representatives of the City of San Bernardino to enter upon the above-described property for inspection purposes.

EXPIRATION

This permit shall be void and of no further force or effect if work hereunder is not commenced by _____ or if work is suspended or abandoned for a period of 180 days or more after work is commenced.

APPLICANT / PROJECT OWNER RESPONSIBILITY

- The project address must be visible from street. Check address visibility prior to calling for inspections (UBC Section 513).
- Lot corners/property lines must be properly staked in order to do a setback inspection. If neighboring structures appear not to have the proper setbacks a field survey by a licensed land surveyor shall be required (UBC Section 305[a]).
- City "approved" plans and job inspection card must be on project site, available for Building Inspector's examination (UBC Section 303[b]).
- The Department of Building and Safety must be called to make progress inspections (UBC Section 305[a]).
- All work is to be inspected prior to covering; work covered without City inspection must be uncovered at owner's/contractor's expense (UBC Section 305[a]).
- The project is to be built in accordance with City approved plans. Deviations from approved plans must be approved in writing from the City (UBC Section 303[a]).
- The owner must obtain a Certificate of Occupancy from City prior to occupying the building or using the project (UBC Section 307[a]).

Shelly,

Good morning. Can we do one day next week? Maybe Wednesday or Thursday?
I checked our database and they pulled a permit to operate a pallet yard and it
was approved by our Planning Department. I am waiting on a response from our
Planning Department manager regarding the pallet yard restrictions/guidelines. I
called Business Registration and their business registration is expired as of
12/31/2019. I informed them that you guys requested that they respond to the
property as well when we conduct the joint inspection.

Good Morning Nicole,

I wanted to follow-up with you regarding the above address. I emailed you last
week with our concerns and was hoping to schedule a walk thru with you and
possibly business licensing. Attached are Notices of Violation that were issued
on the property. We are hoping with a coordinated effort we can bring them into
compliance.

Thank you ?

Case Notes	N. Sorensen	08/07/2020	8:43 am	0.08	From: Nicole Sorensen Sent: Friday, August 7, 2020 8:43 AM To: David Sterling Cc: Minerva Berumen Subject: 5770 N industrial Pkwy
------------	-------------	------------	---------	------	---

David,

Good morning! Fire has contacted me about this property and advised there are 5 different pallet businesses operating out of this one property. They have issued notices, however have gained no compliance. Fire is requesting Code Enforcement and Business Registration conduct a joint inspection with them out at this property next week on Wednesday 8/12/2020 at 9:00am. Does this work for you?

I called Business Registration yesterday and spoke with Minerva who advised me the property's Business Registration is expired as of 12/31/2019. Minerva advised you would be the Inspector assigned to this, but that she could assist if a Spanish translator was needed. I think it would be a good idea if we did have a Spanish translator out there with us. Feel free to call me if you have any questions. Have a good day.

Thank you,

Nicole Sorensen
Code Enforcement Officer

Case Notes	N. Sorensen	08/07/2020	2:00 pm	0.25	E. Lithen & I spoke w/ Planning Dept (O. Mujica and E. Mora) about property - Mora printed the Resolution 2018-076/ Development Permit D18-12 (scanned & uploaded to case). She advised no businesses should be operating at the location until all of the Conditions of Approval have been met, including an 8 foot block wall around the entire property being installed with 10 feet of landscaping just inside of the wall surrounding the entire property. She advised 5 businesses should not be operating at the location and that Planning would only give approval for ONE pallet yard business to operate at the property after all conditions of approval have been met and all permits have been obtained.
------------	-------------	------------	---------	------	--

Case Notes	N. Sorensen	08/11/2020	3:00 pm	0.08	Water Record - No Water department accounts found with the selection criteria. Please modify the query on the previous page!! --- Called the Water Dept and spoke with Zina. Advised there is an Active account under [REDACTED]
------------	-------------	------------	---------	------	--

Case Notes	N. Sorensen	08/12/2020	8:00 am	0.16	Spoke w/ Planning Dept. Supervisor Oliver Mujica - Advised him of group inspection w/ Fire and Busn. Reg. and asked him if someone from their Dept
------------	-------------	------------	---------	------	--

wanted to go. He said no one from Planning would be responding. He said there have been no improvements completed, no Certificate of Occupancy has been issued and that no businesses should be operating at the property until all of the Conditions of Approval have been met and said they need to obtain all of their permits for development/improvements.

Inspection	N. Sorensen	08/12/2020	9:00 am	1.25	INSPECTION - w/ SB County Fire, SB City Business Registration Minerva and Building Inspectors J. MacDougall & J. Jimenez. Photo doc'd. At least 5 different pallet yard business operating out of this one property. Busn Reg. issued an ACP to 4 businesses FOR \$100.00/day and an NOV to Chagolla Pallets. Property owner [REDACTED] arrived. Provided cell phone# [REDACTED] for her and her assistant [REDACTED]. [REDACTED] had many excuses as to why the property was out of compliance and businesses were still operating. Keith Moore (with Fire) and myself advised her that the businesses needed to stop operating immediately, she needs to comply with the Fire Dept and the City's notices and the storage needs to be removed. I informed her that per the Planning Dept, all improvements need to be completed BEFORE a business can operate and to contact the Planning Dept for more information.
Notice of Violation	N. Sorensen	08/14/2020	1:47 pm	0.00	Send to (Posting Copy,Owner,Owner - UM, MICHELLE)
Case Notes	Laural Paul	08/14/2020	1:54 pm	0.00	MAILED NOV
Inspection	N. Sorensen	08/14/2020	3:12 pm	0.08	POSTED NOV - Pallet yard businesses still operating.
Case Notes	N. Sorensen	08/19/2020	2:04 pm	0.08	From: Stephanie Sanchez Sent: Wednesday, August 19, 2020 2:04 PM To: Nicole Sorensen Subject: Message Hi Nicole, I received a message from Kevin looking to speak with you on a CE Case: Kevin - TK Management 5770 N. Please visit www.SBCity.org for more information.
Case Notes	N. Sorensen	08/20/2020	7:25 am	0.08	Returned call to Kevin [REDACTED] (TK Management) - Said the owner has hired him to try to resolve all of the issues at her property. Says he has called Travis Martin (Planning Dept) and the Fire Dept. Says he processed the change over from the machine shop to the pallet yard. Says someone came in and was going to buy the property so owner stopped the improvements. She owns the vacant lot next door. The possible buyer was going to tear down the entire bldg and put in a big industrial bldg on both lots. Says he spoke with Jessica at Fire Dept. and David Sterling. Provided his e-mail: kevin.tkmanagementservices@hotmail.com. Said electricians are coming out on Friday to walk the property and see what improvements/repairs need to be done.
Case Notes	N. Sorensen	08/26/2020	2:37 pm	0.08	Planning Director O. Mujica came into Code office and advised he is going to draft a letter of what is required of the property owner and if it is not completed they (Planning) are going to revoke their ZVR
Case Notes	N. Sorensen	09/15/2020	11:47 am	0.00	From: Nicole Sorensen Sent: Tuesday, September 15, 2020 11:47 AM To: Oliver Mujica Subject: RE: 5770 Industrial Pkwy - Pallet Yard

Oliver,

Is there any update with this property/property owner? Did you guys give them new conditions or a time frame to comply by? Thanks for your help and have a good day.

Nicole Sorensen
Code Enforcement Officer

Case Notes	N. Sorensen	09/30/2020 4:49 pm	0.16	Spoke w/ O. Mujica in passing cause I haven't received an e-mail response yet. Asked him if they have been in contact with the owner or contractor or sent them new conditions. He said No. Advised him that Fire is requesting an update regarding Planning Dept. Mujica said he'd talk to Mr Huntley about it.
Case Notes	N. Sorensen	01/28/2021 12:29 pm	0.08	Called [REDACTED] for an update - Asked what planner she has been in contact with and she said Horrace Gray. She said she would have her project manager Kevin call me.
Case Notes	N. Sorensen	01/29/2021 8:12 am	0.15	Received a call from contractor Kevin [REDACTED] - He says he has been in contact e-mailing back and forth between B.O. Tim Tran, permit tech Horrace Gray and planner Travis Martin. He says the owner is 100% wanting to complete this project but they are waiting for Building & Safety to issue the permit. He said the owner is having issues of tenants there not paying their rent and having them leave due to the COVID-19 rent/eviction restrictions.

Officer: N. Sorensen**

To Whom It May Concern:

As you may be aware, an inspection of the above property was conducted on **August 12, 2020**. In an effort to improve and restore the community, the City of San Bernardino is actively enforcing the San Bernardino Municipal and Development Codes. According to available records, you are listed as an owner or other interested party regarding this property. This Notice of Violation is submitted to you, requesting your cooperation in correcting the violations below.

The following violations were observed during the property inspection, it is necessary to perform the corrective action(s) before the Compliance Date. Another inspection will be conducted on or immediately after the compliance date to verify compliance.

Code Section	Corrective Action	Compliance Date
SBDC § 19.46.060(1) Development Code Penalty	<p>IMMEDIATELY CEASE OPERATING BUSINESSES AT THIS PROPERTY. PER THE PLANNING DEPARTMENT, ALL CONDITIONS OF APPROVAL UNDER PERMIT# DP-D18-12 NEED TO BE MET BEFORE A BUSINESS WILL BE PERMITTED TO BEGIN OPERATING. Case No: CE-20-1661
Officer: N. Sorensen**

To Whom It May Concern:

As you may be aware, an inspection of the above property was conducted on **August 12, 2020**. In an effort to improve and restore the community, the City of San Bernardino is actively enforcing the San Bernardino Municipal and Development Codes. According to available records, you are listed as an owner or other interested party regarding this property. This Notice of Violation is submitted to you, requesting your cooperation in correcting the violations below.

The following violations were observed during the property inspection, it is necessary to perform the corrective action(s) before the Compliance Date. Another inspection will be conducted on or immediately after the compliance date to verify compliance.

Code Section	Corrective Action	Compliance Date
SBDC § 19.46.060(1) Development Code Penalty	<p>IMMEDIATELY CEASE OPERATING BUSINESSES AT THIS PROPERTY. PER THE PLANNING DEPARTMENT, ALL CONDITIONS OF APPROVAL UNDER PERMIT# DP-D18-12 NEED TO BE MET BEFORE A BUSINESS WILL BE PERMITTED TO BEGIN OPERATING. CONTACT BUILDING & SAFETY (909)384-5935 TO OBTAIN ALL NECESSARY PERMITS FOR DEVELOPMENT/IMPROVEMENTS, SCHEDULE INSPECTIONS AND FINALIZE ALL PERMITS. FAILURE TO COMPLY WITH THIS NOTICE WILL RESULT IN ADMINISTRATIVE CITATIONS AND/OR FURTHER CITY ACTION.</p> <p>Any person, partnership, organization, firm or corporation, whether as principal, agent, employee or otherwise, violating any provision(s) of this Development Code or any condition imposed on an entitlement, development permit, map or license, or violating or failing to comply with any order made hereunder, shall be guilty of an infraction or a misdemeanor and, upon conviction thereof, shall be punished as set forth in Section 1.12.010 of the Municipal Code, in addition to any other civil or administrative remedies provided by law. – Obtain all necessary approvals for permit requirements as issued by Building & Safety (909-384-5071).</p>	08/28/20

The term “recreational vehicle” includes, but is not limited to motor homes, fifth-wheels, campers, camp trailers, trailers, boats, watercraft, and all terrain vehicles -</p>	08/28/20

Failure to correct the violations above may result in an **Administrative Civil Penalty being issued for up to \$1,000.00 per violation/per day**; criminal prosecution, the issuance of a Misdemeanor Citation, Administrative Citations, and/or other legal action including Abatement Proceedings being taken to ensure compliance with the applicable codes. If the City is forced to proceed with abatement proceedings, the owner(s) of record may incur direct costs plus a 40% administrative fee. Any unpaid costs incurred by the City will be made as a lien and/or special assessment upon the property.

The City would like to avoid taking any further actions and requests your cooperation in this matter. By acting immediately to correct the violation(s) referenced, you will avoid further action by the City.

If you have any questions, please contact N. Sorensen at (909)384-5321. Please provide the case number **20-1661** and the property address. We appreciate your cooperation in this matter.

Sincerely,

N. Sorensen

Dear Requestor:

We have received your Public Records Act Request from the Department of Toxic Substances Control (DTSC). After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's Data Management System. It tracks our cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 714-4845337 or via email at CypressFileRoom@dtsc.ca.gov.

Sincerely,

Julie Johnson

REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT

The main focus of a REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardino County Fire Protection District (SBCFPD) any record relating to contamination or reports of spills at a particular site. An Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by SBCFPD, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, which can be a useful tool in providing a history of compliance or non-compliance.

Once SBCFPD has completed its records search, an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report will be prepared and issued. Such report will detail all SBCFPD records associated with a particular site by type, date, location, and status (where applicable). All files identified in an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.

If the completed records search reveals no SBCFPD record of hazardous material activity at the site, an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report will be issued, noting that “no records” were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found, list another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (e.g., NWC 5th Ave. & Main St.), and/or legal description. If possible, please attach a map to this request form.

SITE INFORMATION

**** IMPORTANT –THIS PAGE MUST BE SIGNED PRIOR TO SUBMITTAL ****

DISCLAIMER: While all attempts are made to provide accurate, current, and reliable information, San Bernardino County Fire Protection District (*further referred to as SBDFPD*) recognizes the possibility of human error. Therefore, SBCFPD, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report and provides an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report “as is,” with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall SBCFPD be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. SBCFPD therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

RELEASE AND INDEMNIFICATION: In consideration for the issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge SBCFPD, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with SBCFPD’s issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of SBCFPD, its officers, employees, agents and volunteers.

I am familiar with the provisions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from SBCFPD’s issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report.

In further consideration for SBCFPD’s issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless SBCFPD, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with SBCFPD’s issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report brought by any third party.

I have read the above terms and conditions, including the paragraphs entitled “DISCLAIMER” and “RELEASE AND INDEMNIFICATION”, and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.

I hereby request an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.

- I am including payment of the initial fee of \$136.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Protection District, or by credit card payment taken over the phone. I understand that research exceeding one hour will be billed at the rate of \$136.00 for each additional hour spent by SBCFPD in completing this request.
- I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.

RESOLUTION NO. 2018-076

A RESOLUTION OF THE DEVELOPMENT AND ENVIRONMENTAL REVIEW COMMITTEE OF THE CITY OF SAN BERNARDINO, CALIFORNIA, APPROVING DEVELOPMENT PERMIT TYPE-D 18-12 TO ALLOW THE ESTABLISHMENT AND OPERATION OF A PALLET MANUFACTURING, REPAIR, AND STORAGE FACILITY, ALONG WITH THE CONSTRUCTION OF THE REQUIRED ON-SITE AND OFF-SITE IMPROVEMENTS, ON A PARCEL CONTAINING APPROXIMATELY 4.95 ACRES LOCATED AT 5770 N. INDUSTRIAL PARKWAY (APN: 0266-041-22) WITHIN THE INDUSTRIAL HEAVY (IH) ZONE, AND FIND THE PROJECT SUBJECT TO A CATEGORICAL EXEMPTION UNDER CEQA.

WHEREAS, on August 30, 2018 pursuant to the requirements of Section 19.44.020 of the City of San Bernardino Development Code, an application for Development Permit Type-D 18-12 was duly submitted by:

Property Owner: FGWS Holdings, LLC
5770 N. Industrial Parkway # I
San Bernardino, CA 92407

Project Applicant: Michelle Um
5469 Woodside Place
Rancho Cucamonga, CA 91737

Parcel Address: 5770 N. Industrial Parkway
APN: 0266-041-22
Lot Area: 4.95 Acres

WHEREAS, Development Permit Type-D 18-12 is a request to allow the establishment and operation of a pallet manufacturing, repair, and storage facility, along with the on-site and off-site improvements, on a parcel containing approximately 4.95 acres; and

WHEREAS, the Planning Division of the Community Development Department has reviewed Development Permit Type-D 18-12 for consistency with the City of San Bernardino General Plan and compliance with the City of San Bernardino Development Code; and

WHEREAS, pursuant to requirements of the California Environmental Quality Act (“CEQA”), the Planning Division of the Community Development Department evaluated Development Permit Type-D 18-12 and determined that it is exempt from CEQA pursuant to a categorical exemption (listed in CEQA Guidelines Article 19, commencing with Section 15300) and the application of that categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

WHEREAS, on November 28, 2018 pursuant to the requirements of Section 19.52.020 of the City of San Bernardino Development Code, the City gave public notice by advertising in the San Bernardino Sun, a newspaper of general circulation within the City of San Bernardino, and by mailing notices to the property owners within 500 feet of the subject property of the holding of a public hearing at which the Environmental Determination and Development Permit Type-D 18-12 would be considered; and

WHEREAS, on December 12, 2018, pursuant to the requirements of Section 19.52.040 of the City of San Bernardino Development Code, the Development and Environmental Review Committee held the duly noticed public hearing at which interested persons had an opportunity to testify in support of, or opposition to the Environmental Determination and Development Permit Type-D 18-12; and

WHEREAS, pursuant to the requirements of Chapter 19.44 of the City of San Bernardino Development Code, the Development and Environmental Review Committee has the authority to take action on the Environmental Determination and Development Permit Type-D 18-12.

NOW, THEREFORE, the Development and Environmental Review Committee of the City of San Bernardino does hereby resolve, determine, find, and order as follows:

SECTION 1. ENVIRONMENTAL DETERMINATION:

The Planning Division conducted an environmental evaluation in connection with proposed Development Permit Type-D 18-12 and concluded that Development Permit Type-D 18-12 is exempt under Section 15301 (Existing Facilities) of the CEQA Guidelines. Section 15301 covers projects consisting of the operation, repair, maintenance, permitting, leasing licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination. The Planning Division staff has analyzed proposed Development Permit Type-D 18-12 and has determined that it is categorically exempt from CEQA pursuant to Section 15301 of the CEQA Guidelines due to the fact that: 1) The project involves negligible or no expansion of an existing use, and 2) and the application of that categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2

The operation of the proposed manufacturing, repair, and storage of pallets meets all General Plan and Zoning regulations, and the project site is already improved, and was previously occupied by a machine shop with outdoor storage for mining equipment. The project proposes a only minor upgrades to paving and landscaping on-site and no expansion of the existing structure. The proposed project is located in the Industrial Heavy (IH) zone, which allows a wide range of industrial uses, including manufacturing, repair, and outdoor storage uses, subject to the approval of a Development Permit pursuant to the requirements of the Development Code and General Plan.

SECTION 2. FINDINGS FOR DEVELOPMENT PERMIT TYPE-D 18-12:

Pursuant to Section 19.44.040 of the City of San Bernardino Development Code Development Permit applications are required to meet certain findings prior to the approval by the Development and Environmental Review Committee. Accordingly, the following findings are provided in support of the approval of Development Permit Type-D 18-12:

Finding No. 1: The proposed development is permitted within the subject zoning district and complies with all applicable provisions of the Development Code, including prescribed site development standards and applicable design guidelines.

Finding of Fact: Manufacturing, repair, and outdoor storage of equipment and materials including pallets are permitting uses within the Industrial Heavy (IH) zone subject to the approval of a Development Permit and the proposed project will be conditioned to meet all Development Code requirements.

Finding No. 2: The proposed development is consistent with the General Plan.

Finding of Fact: The proposed project is consistent with General Plan goals and policies including the following:

General Plan Land Use Element Policy 2.8.2: Ensure that design and development standards appropriately address the hazards posed by wildfires and wind, with particular focus on varying degrees of these threats in the foothills, valleys, ridges, and the southern and western flanks of the San Bernardino Mountains.

General Plan Economic Development Element Policy 4.1.4: Diversify the industrial mix with a balance of warehousing/distribution, manufacturing, and research and development uses.

General Plan Economic Development Element Policy 4.3.1: Market industrial vacancies and new opportunity sites in the City to maintain occupancies at a level higher than the regional average.

General Plan Safety Element Policy 10.11.1: Continue to conduct long-range fire safety planning efforts to minimize urban and wildland fires, including enforcement of stringent building, fire, subdivision and other Municipal Code standards, improved infrastructure, and mutual aid agreements with other public agencies and private sector.

The project consists of establishing a pallet manufacturing, repair, and storage facility at a site previously developed and used for the manufacturing and storing of mining equipment. The project is located in an area of the City designated as High Wind and High Fire. Consultation with the San Bernardino County Fire Department resulted in conditions of approval that would reduce the risk of urban fire at the proposed pallet yard.

Finding No. 3: The proposed development is harmonious and compatible with existing and future developments within the land use district and general area, as well as the land uses presently on the subject property.

Finding of Fact: The proposed project is surrounded by a mix of vacant land and industrial warehouses and is located within the Industrial Heavy (IH) zone, which permits manufacturing, repair and storage facilities subject to the approval of a Development Permit.

Finding No. 4 The proposed development is in compliance with the requirements of the California Environmental Quality Act (CEQA) and Section 19.20.030 of the Development Code.

Finding of Fact: The proposed project is exempt from CEQA under Section 15301 (Existing Facilities) due to the fact that the project involves little or no expansion of use, and will be conditioned to meet all current Development Code standards.

Finding No. 5: There will be no potentially significant negative impacts upon environmental quality and natural resources that could not be properly mitigated and monitored.

Finding of Fact: The project is located on a fully developed site and is exempt from CEQA review as there is no proposed expansion of use. Additionally, the project has been conditioned to reduce the risk of urban fire.

Finding No. 6: The subject site is physically suitable for the type and density/intensity of use being proposed.

Finding of Fact: The proposed project is located on a fully developed site and is exempt from CEQA review as there is no proposed expansion of use, and is located within the Industrial Heavy (IH) zone which allows the proposed use subject to the approval of a Development Permit. Therefore, the project site is physically suitable for the type and density/intensity of the use being proposed.

Finding No. 7: There are adequate provisions for public access, water, sanitation, and public utilities and services to ensure that the proposed use would not be detrimental to public health and safety.

Finding of Fact: The project site is already developed and serviced by a full range of public utilities and services and would not be detrimental to the public health and safety.

Finding No. 8: The location, size, design, and operating characteristics of the proposed use are compatible with the existing and future land uses within the general area in which the proposed use is to be located and will not create significant noise, traffic or other conditions or situations that may be objectionable or detrimental to other permitted uses in the vicinity or adverse to the public interest, health, safety, convenience, or welfare of the City.

Finding of Fact: The proposed project is located on a fully developed site and is exempt from CEQA review as there is no proposed expansion of use, and is located within the Industrial Heavy (IH) zone which allows the proposed use subject to the approval of a Development Permit. Additionally, the project has been conditioned to reduce the risk of urban fire. Therefore, the proposed use will not create significant noise, traffic or other conditions or situations that may be objectionable or detrimental to other permitted uses in the vicinity or adverse to the public health, safety, convenience, or welfare of the City.

SECTION 3. CONDITIONS OF APPROVAL:

The approval of Development Permit Type-D 18-12 shall be subject to the following Conditions of Approval:

1. This approval is to allow the establishment and operation of a pallet manufacturing, repair, and storage facility, along with the construction of the required on-site and off-site improvements, on a parcel containing approximately 4.95 acres located at 5770 N. Industrial Parkway (APN: 0266-041-22) within the Industrial Heavy (IH) zone.
2. The project site shall be developed and maintained in accordance with the plans stamped December 12, 2018 (EXHIBIT "A"), approved by the City, which includes a site plan, on file in the Planning Division; the Conditions of Approval contained herein; and, the City's Municipal Code regulations.
3. Within two (2) years of the Development Permit approval, commencement of construction shall have occurred or the permit/approval shall become null and void. In addition, if after commencement of construction, work is discontinued for a period of one year, then the permit/approval shall become null and void. However, approval of the Development Permit does not authorize commencement of construction. All necessary permits must be obtained prior to commencement of specified construction activities included in the Conditions of Approval.

EXPIRATION DATE: December 12, 2020

4. The review authority may, upon application being filed thirty (30) days prior to the expiration date of Development Permit Type-D 18-12 and for good cause, grant a time extension not to exceed twelve (12) months. The review authority shall ensure that the project complies with all current Development Code provisions.
5. In the event this approval is legally challenged, the City will promptly notify the applicant of any claim, action or proceeding and will cooperate fully in the defense of this matter. Once notified, the applicant agrees to defend, indemnify and hold harmless the City of San Bernardino (City), any departments, agencies, divisions, boards or commission of the City as well as predecessors, successors, assigns, agents, directors, elected officials, officers, employees, representatives and attorneys of the City from any claim, action or proceeding against any of the foregoing persons or entities. The applicant further agrees to reimburse the City for any costs and attorneys' fees which the City may be required by a court to pay as a result of such action, but such participation shall not relieve applicant of his or her obligation under this condition.

The costs, salaries, and expenses of the City Attorney and employees of his office shall be considered as "Attorney's fees" for the purpose of this condition. As part of the consideration for issuing this Development Permit, this condition shall remain in effect if the Development Permit is rescinded or revoked, whether or not at the request of applicant.

6. The property owner(s), facility operator and property management will be responsible for regular maintenance of the site. Vandalism, graffiti, trash and other debris must be removed within 24 hours of being reported.
7. Signs are not approved as a part of this permit. Prior to establishing signs, the applicant must submit an application for approval by the Planning Division. Banners, flags, pennant, and similar signs are prohibited unless a Temporary Sign Permit is obtained.
8. The applicant/owner shall maintain all existing landscaping in the parking lot and setbacks in a weed and disease free condition at all times and any dead or missing vegetation must be promptly replaced.
9. Construction-related activities may not occur between the hours of 8:00 pm and 7:00 am. No construction vehicles, equipment, or employees may be delivered to, or arrive at the construction site before 7:00 am or leave the site after 8:00 pm.
10. The project shall comply with all applicable requirements of the City of San Bernardino Community Development Department, Land Development and Building & Safety Divisions, Police Department, Municipal Water Department, Public Works Department, the City Clerk's Office/Business Registration Division, and the San Bernardino County Consolidated Fire District.
11. An eight (8) foot decorative block wall shall be required around the perimeter of the property.

12. High release landscaping materials such as palm trees and long grasses shall be prohibited.
13. Outdoor welding, grinding, or any other activity that could result in sparking are strictly prohibited.
14. Trash enclosures must not overflow, and loose debris and litter shall be prohibited on the project site.
15. During Cal Fire Red Flag Warning Days, the stacking height for pallets shall be limited to no more than eight (8) feet.
16. The location of outdoor pallet stacking shall be limited to the north side of the building.
17. Every six (6) months, over a period of two (2) years from the issuance of the Certificate of Occupancy, the Planning Division shall conduct an inspection of the business operations and property to ensure compliance with the Conditions of Approval to the satisfaction of the Community Development Director. In the event that an unresolved issue continues to exist, the applicant shall submit an application, and appropriate application fee, for reconsideration by the Development and Environmental Review Committee.
18. All property improvement related conditions of approval shall be completed prior to the issuance of a Certificate of Occupancy. All operations related conditions of approval shall be implemented for the duration of the approved land use.

Land Development Division

19. Drainage and Flood Control

- a) A local drainage study will be required for the project. Any drainage improvements, structures or storm drains needed to mitigate downstream impacts or protect the development shall be designed and constructed at the developer's expense, and right-of-way dedicated as necessary.
- b) The detention basin shall be designed in accordance with "Detention Basin Design Criteria for San Bernardino County." Retention basins are not acceptable.
- c) All drainage from the development shall be directed to an approved public drainage facility. If not feasible, proper drainage facilities and easements shall be provided to the satisfaction of the City Engineer.
- d) If site drainage is to be outlet into the public street, the drainage shall be conveyed through a parkway culvert constructed in accordance with City Standard No. 400. Conveyance of site drainage over the Driveway approaches will not be permitted.
- e) A Preliminary Full-Categorical Water Quality Management Plan (WQMP) is conceptually approved with minor comments to incorporate into the Final WQMP Plan. Comments will be provided to the Engineer.

- f) A Final Full-Categorical Water Quality Management Plan (WQMP) is required for this project. The applicant is directed to the County of San Bernardino's Flood Control web page for the template and Technical Guidance Document. The Land Development Division, prior to issuance of any permit, shall approve the WQMP. A CD copy of the approved WQMP and Hydrology Study shall be required prior to grading permit issuance.
- g) A Storm Water Pollution Prevention Plan (SWPPP) will be required. The applicant is directed to State Water Resources Control Board (SWRCB) SMART Login system. The SWPPP shall be approved by the State and a CD copy of the approved SWPPP shall be submitted to City prior to grading permit issuance.
- h) A "Notice of Intent (NOI)" shall be filed with the State Water Resources Control Board for construction disturbing 1 acre or more of land (including the project area, construction yards, storage areas, etc.). A WDID number issued by the State of California is required prior to the issuance of grading permit.
- i) The Land Development Division, prior to grading plan approval, shall approve an Erosion Control Plan. The plan shall be designed to control erosion due to water and wind, including blowing dust, during all phases of construction, including graded areas which are not proposed to be immediately built upon.

20. Grading and Landscaping

- a) The grading and on-site improvement plan shall be signed by a Registered Civil Engineer and a grading permit will be required. The grading plan shall be prepared in strict accordance with the City's "Grading Policies and Procedures" and the City's "Standard Drawings", unless otherwise approved by the Building Official.
- b) If more than 5 trees are to be removed from the site, a tree removal permit conforming to the requirements of Section 19.28.100 of the Development Code shall be obtained from the Department of Community Development - Planning Division prior to issuance of any grading or site development permits.
- c) If the grading plan indicates export or import, the source of the import material or the site for the deposition of the export shall be noted on the grading plan. Permit numbers shall be noted if the source or destination is in the City of San Bernardino.
- d) If more than 50 cubic yards of earth is to be hauled on City Streets then a special hauling permit shall be obtained from the City Engineer. Additional conditions, such as truck route approval, traffic controls, bonding, covering of loads, street cleaning, etc. may be required by the City Engineer.
- e) A liquefaction evaluation is required for the site. This evaluation must be submitted and approved prior to issuance of a grading permit. Any grading requirements recommended by the approved liquefaction evaluation shall be incorporated in the grading plan.

- f) Continuous concrete curbing at least 6 inches high and 6 inches wide shall be provided at least 3 feet from any wall, fence, property line, walkway, or structure where parking and/or drive aisles are located adjacent thereto. Curbing may be left out at structure access points. The space between the curb and wall, fence, property line, walkway or structure shall be landscaped, except as allowed by the Development Review Committee.
- g) The refuse enclosure(s) shall be constructed in accordance with City Standard Drawing No. 508. The minimum size of the refuse enclosure shall be 8 feet x 15 feet for bins storage area. Where a refuse enclosure is proposed to be constructed adjacent to spaces for parking passenger vehicles, a 3' wide by 6" high concrete planter shall be provided to separate the enclosure from the adjacent parking. The placement of the enclosure and design of the planter shall preclude the enclosure doors from opening into drive aisles or impacting against adjacent parked cars.
- h) Retaining walls, block walls and all on-site fencing shall be designed and detailed on the on-site improvement Plan. This work shall be part of the on-site improvement permit issued by the Building Official. All masonry walls shall be constructed of decorative block with architectural features acceptable to the City Planner.
- i) No construction on a site shall begin before a temporary/security fence is in place and approved by the Building Official or his designee. Temporary/security fencing may not be removed until approved by the Building Official or his designee. The owner or owner's agent shall immediately remove the temporary/security fencing upon the approval of the Building Official or his designee. Sites that contain multiple buildings shall maintain the temporary/security fencing around the portion of the site and buildings under construction as determined by the Building Official or his designee. All temporary/security fencing for construction sites shall include screening, emergency identification and safety identification and shall be kept in neat and undamaged condition.
- j) The on-site improvement plan shall include details of on-site lighting, including light location, type of poles and fixtures, foundation design with structural calculations, conduit location, material and size, and Photometric plot shall be provided which show that the proposed on-site lighting design will provide:
- 1 foot-candle of illumination uniformly distributed over the surface of the parking lot during hours of operation
 - 0.25 foot-candles security lighting during all other hours.
- k) The project Landscape Plan shall be reviewed and approved by the Land Development Division prior to issuance of a grading permit. Submit 3 copies to the Land Development Division for Checking.
- l) Prior to occupancy of any building, the developer shall post a bond to guarantee the maintenance and survival of project landscaping for a period of one year.

- m) The public right-of-way, between the property line and top of curb (also known as “parkway”) along adjoining streets shall be landscaped by the developer and maintained in perpetuity by the property owner. Details of the parkway landscaping shall be included in the project’s on-site landscape plan.
21. Street Improvement and Dedications
- a) See Public Works Conditions of Approval
22. Required Engineering Plans
- a) A complete submittal for plan checking shall consist of:
 - street improvement plans (may include street lights or street lighting may be separate plan),
 - storm drain plans (Private storm drains may be shown on on-site improvement plans; public storm drains must be on a separate plan with profile),
 - signing and striping plan (may be on sheets included in street improvement plan),
 - lighting (on-site lighting may be included in on-site improvement plan or may be on a separate stand-alone plan),
 - grading (may be incorporated with on-site improvement plan),
 - on-site improvement plans and on-site landscaping and irrigation,
 - water plans (shall be submitted to San Bernardino Municipal Water Department),
 - other plans as required. Piecemeal submittal of various types of plans for the same project will not be allowed.
 - All required supporting calculations, studies and reports must be included in the initial submittal (including but not limited to drainage studies, soils reports, structural calculations)
 - b) All off-site improvement plans submitted for plan check shall be prepared on the City’s standard 24” x 36” sheets. A signature block satisfactory to the City Engineer or his designee shall be provided.
 - c) After completion of plan checking, final mylar drawings, stamped and signed by the Registered Civil Engineer in charge, shall be submitted to the City Engineer and/or Building Official for approval.
 - d) Copies of the City’s design policies and procedures and standard drawings are available at the Public Works Counter for the cost of reproduction. They are also available at no charge at the Public Works Web Site at <http://www.sbcity.org>
23. Required Engineering Permits
- a) Grading permit.

- b) On-site improvements construction permit (except buildings - see Development Services-Building Division), including landscaping.

Public Works Department

24. Street Improvement and Dedications

- a) For the streets listed below, dedication of adequate street right-of-way (R.W.) per the General Plan and Municipal Code shall provide the distance from street centerline to property line and placement of the curb line (C.L.) in relation to the street centerline shall be as follows:

<u>Street Name</u>	<u>Right of Way(ft.)</u> From Centerline	<u>Curb Line(ft)</u> From Centerline
Industrial Parkway (266-041-22)	Existing Varies (no dedication at this time) "Secondary Arterial"	32' Existing (none widening at this time)

- b) Industrial Parkway: * - **
 - i) *Future* - The street shall be rehabilitated to meet the requirements detailed in a soils report based on the "R" value of the subgrade and the traffic Index. The City's has a minimum of 2" Grind and Overlay; However the Soils Report may indicate a thicker or different improvement.
 - ii) *Future* - Construct Sidewalk per City Standard No. 202; Case "A" (6' wide adjacent to curb).
 - iii) *Future* - Existing Street Light System shall be replaced in accordance with City Standard Nos. SL-1, SL-2, and SL-3. Also, a separate light plan may be submitted in accordance with the City of San Bernardino Street Lighting Design Policies
 - iv) *Future* - The existing driveway to the north shall be continued to the new Industrial Parkway and a construct a new driveway per city standards.
 - v) *Future* - Removal of the existing old industrial parkway with a knuckle shall be constructed at the northlery property line.
 - vi) *Future* - Install 2-3" Conduit 36" under the sidewalk with pull rope and pull boxes for future Traffic connections.

Article I. *Future* - These items are based on the improvements of the building, when increasing the building size these conditions shall be implemented.

Article II. * These Conditions are set for an estimated construction within two years. If construction exceeds two years from DERC Approval these conditions shall be reviewed and updated as needed.

Article III. **If a Scoping Form is required, this form shall indicate the need of a Traffic Report, the results of the traffic report shall become conditions of this project which may increase or extend the above requirements in section 1(b) and 5(a).

- c) A second copy of the drainage report will be delivered to public works, if offsite or overflow storm drain systems are identified, all systems shall be identified on the street improvement plans, public storm drain shall be on a separate set of plans.
- d) A temporary construction encroachment permit from Public Works Department shall be required for utility cuts into existing streets or any work within City's right-of-way. Pavement restoration or trench repair shall be in conformance with City Standard No. 310. Public facilities shall be restored or constructed back to Public Works Department satisfaction.
- e) Any pavement works affecting the traffic loop detectors shall be coordinated and subjected to Public Works Traffic Division requirements.
- f) The applicant must post a performance bond prior to issuance of the off-site permit. The amount of the bond is to be determined by Public Works Department.
- g) The above conditions shall comply with current codes, and policies at time of construction.

25. Required Engineering Plans

- a) A complete submittal for plan checking shall consist of:
 - street improvement plans,
 - public storm drains must be on a separate plan with profile, private storm drains may be shown on on-site and off-site improvement plans,
 - traffic signal plans must be submitted on a separate plan (if required by conditions or traffic reports),
 - signing and striping plan (may be on sheets included in street improvement plan, verification and approval prior to submission),
 - lighting for offsite plans must be submitted on a separate plan unless prior approval before submission,
 - other plans as required. Piecemeal submittal of various types of plans for the same project will not be allowed.
 - All required supporting calculations, studies and reports must be included in the initial submittal (including but not limited to drainage studies, soils reports, structural calculations)
- b) All off-site improvement plans submitted for plan check shall be prepared on the City's standard 24" x 36" sheets. A signature block (city standard block)

satisfactory to the City Engineer or his designee can be found on the City Web Site <http://www.sbcity.org>. Conditions of the project shall be inserted in the plans.

- c) After completion of plan checking, final mylar drawings with city standard block, stamped and signed by the Registered Civil Engineer in charge, shall be submitted to the City Engineer and/or Building Official for approval.
 - d) Electronic files of all improvement plans/drawings shall be submitted to the City Engineer. The files shall be compatible with AutoCAD 2015, and include a .dxf file of the project. Files shall be on CD and shall be submitted at the same time the final mylar drawings are submitted for approval.
 - e) Copies of the City's design policies and procedures and standard drawings are available at the Public Works Counter for the cost of reproduction. They are also available at no charge at the Public Works Web Site at <http://www.sbcity.org>
26. Required Engineering Permits
- a) Off-site improvement construction permits.
 - b) Traffic Control and ROW Permits.
27. Applicable Engineering Fees
- a) All plan check, permit, inspection, and impact fees are outlined on the Public Works Fee Schedule. A deposit in the amount of 100% of the estimated checking fee for each set of plans will be required at time of application for plan check. The amount of the fee is subject to adjustment if the construction cost estimate varies more than 10% from the estimate submitted with the application for plan checking.
 - b) The current fee schedule is available at the Public Works Counter and at <http://www.sbcity.org>
28. Traffic Requirements
- a) All Traffic mitigation measures shall be implemented according to the recommendations of the City Traffic Engineer prior to Street Improvement plan approval.

San Bernardino County Fire Department

- 29. The project shall comply with all current Building Codes, Fire Codes and Fire Department standard requirements based on occupancy classification.
- 30. Any changes to this proposal shall require a new Fire Department condition letter.
- 31. Any changes to the approved life safety system shall require plans to be submitted to the Fire Department prior to construction including the following: fire sprinklers, fire alarms, underground water supply for fire protection, cooking appliances and hood protections.
- 32. A monitored fire sprinkler system is required for the proposed building. Plans shall be submitted to the Fire Department prior to construction. PER CFC 903.2.1.1.

33. A Knox Box/Key Box is required, and shall be provided and installed in accordance with the California Fire Code and Fire Department standards.
34. The required fire flow for this project shall meet the minimum requirements established in the California Fire Code.
35. An approved on-site fire protection water system, in accordance with Fire Department is required to be in place and serviceable prior to construction.
36. Provide a complete on-site fire protection plan to the Fire Department which indicates the location of all required fire protection appliances (FDCs, PIVs, DDCs, proposed and existing fire hydrants, etc.).
37. Fencing, walls or car ports shall not obstruct Fire Department access to fire hydrants and property.
38. All access gates shall require mechanical means for opening in event of power failure, shall not impinge on required clear width when fully open, and shall be equipped with Knox Box lock actuation devices.
39. Storage containers must not block Fire Department access.
40. Provide the following Fire Department notes on the site utility plan:
 - A separate permit is required by the Fire Department for installation of on-site water systems. No work may begin until the permit has been obtained. A permit application may be obtained from Fire Prevention.
 - All hydrants shall have a blue reflective dot placed in the drive adjacent to the hydrants per Fire Department standards.
 - Paint curbs red, 15' to either side of the fire hydrant and FDC.
 - Fire Department connection required within 50 feet of a hydrant.
 - Bollards (crash posts) may be required at time of final inspection (to protect the fire hydrants and FDC from vehicular traffic).
 - Public fire hydrants are required along streets at intervals not to exceed 300 feet for commercial and 500 for residential areas.
41. Premise and building identification and addressing shall be a minimum of 12 inch in height. Single family home addresses shall be a minimum of 4 inches in height and shall be internally illuminated during the hours of darkness.
42. If building will be used for storage of pallets, the sprinkler design will comply with the requirements of NFPA for heights and commodity.
43. Fire sprinklers are required. Tenant Improvements in sprinklered buildings require a separate submittal. Please submit all plans to the County Fire Department.

SECTION 4. DEVELOPMENT AND ENVIRONMENTAL REVIEW COMMITTEE ACTION:

The Development and Environmental Review Committee hereby takes the following action:

1. Find the approval of Development Permit Type-D 18-12 is exempt from CEQA review pursuant to Section 15301 of the CEQA Guidelines and direct the Community Development Director to prepare and file with the Clerk of the Board of the County of San Bernardino, a Notice of Exemption as provided under Public Resources Code Section 21152(b) and CEQA Guidelines Section 15062; and
2. Approve Development Permit Type-D 18-12 based on the Findings of Fact and subject to the recommended Conditions of Approval.

SECTION 5. SEVERABILITY:

If any provision of this Resolution or the application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications, and to this end the provisions of this ordinance are declared to be severable.

PASSED, APPROVED, and ADOPTED this 12th day of December, 2018.

Oliver Mijica, Chair
San Bernardino Development and
Environmental Review Committee

ATTEST:

Stephanie Sanchez, D/ERC Secretary
City of San Bernardino, California

CERTIFICATION:

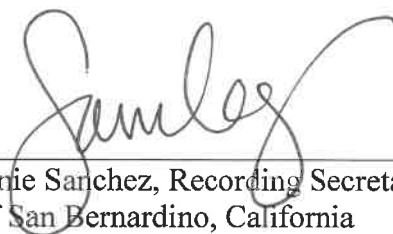

I, Stephanie Sanchez, Recording Secretary of the Development and Environmental Review Committee of the City of San Bernardino, California, do hereby certify that the foregoing Resolution, No. 2018-076-D/ERC, was duly adopted by the Development and Environmental Review Committee of the City of San Bernardino, California, at a regular meeting thereof held on the 12th day of December, 2018, by the following vote, to wit:

AYES: Mujica, Gumpert, Akers, Cotangco, Linberg, Lane, Johnson & Strong

NOES: None

ABSENT: Sepulveda

ABSTAIN: None

Stephanie Sanchez, Recording Secretary
City of San Bernardino, California

WATER USE CALCULATIONS

MAINT (Annual Gallons Allowed)

MAINT = ETO x 0.63 (ETAP x AREA) + (ETAP x 0.63)

MAINT = 55.8 x 0.63 x 21,000 + (0.63 x 0) = 7,416.6 GAL / YEAR

ETW (Estimated Total Water Use)

ETW = 55.8 x 0.63 x AREA + ETW

ETW PA = 55.8 x 0.63 x 21,000 SF + 200,000 GAL / YEAR

ETW TOTAL = 200,000 GAL / YEAR
